🔧 TOOLS:

- Spudger (1)

Step 1 — Removing The Small Keycaps

- For small keycaps (1st image), all you need is a spudger. You just have to pry the keycap off by pushing upwards. (shown in 2nd image)

Step 2 — Removing Large Keycaps

- When removing large keycaps (shown in image 1) , there is a little metal bracket that you need to seperate the keycap from. (image 2) You have to us the spudger to seperate the bracket from the keycap.
