

How to Repair a Cracked Flower Pot

Fixing a cracked flower pot with some glue.

Written By: Irene Amuyunzu

INTRODUCTION

This guide will show you how to repair a cracked flower pot that would have otherwise been thrown away and become waste.

TOOLS:

- [Amazing GOOP or other craft glue](#) (1)
 - [Twine](#) (1)
-

Step 1 — How to Repair a Cracked Flower Pot

- Remove any contents from the pot.

Step 2

- Apply craft adhesive along the broken portion of the pot.

 **Warning:** your adhesive may be flammable. Carefully read the cautions listed on your adhesive before proceeding.

Step 3

- Begin to apply glue onto the broken pieces.
- Once you apply glue to a piece, attach it to the pot.

Step 4

- Scrape away the excess glue on both the outside and inside of the pot with scrap paper.
- ⓘ Make sure to do this before the glue dries completely.

Step 5

- Use a shoelace or twine to tightly hold the pot together while it dries.

i Depending on your glue, drying time may take up to 24-72 hours.

Step 6

- Once your adhesive has finished drying, remove the shoelace or twine.

Step 7

- Return your plant to its pot.

Now your flower pot is fixed and ready to be used!
