

How to Repair a Purse Strap

Fix a ripped purse strap by sewing it back together.

Written By: Jacob Campbell

INTRODUCTION

In order to complete this fix you will need a few things, a pair of scissors, a needle, and a spool of thread. It will require some experience with sewing and will result in a fully functional purse.

TOOLS:

- [Utility Scissors](#) (1)
 - [Thread](#) (1)
 - [Sewing Needle](#) (1)
-

Step 1 — How to Repair a Purse Strap

- Collect the materials needed for the repair and remove the torn strap from the purse.

Step 2

- Frayed thread from the rip on the strap will be trimmed off to make sewing easier.

Step 3

- Wrap the strap around the metal clip to insure it is properly placed before sewing.

Step 4

- Begin sewing starting from the bottom and going up.

Step 5

- Continue to sew to ensure that the strap is secure

Step 6

- Make sure your repair is secure by testing the strap of the purse.

To reassemble your device, follow these instructions in reverse order.
