## Step 1 — How to Sony Xperia E1 - Unlock Network / SIM Lock by Code

- First, check the SIM lock status in Service Menu - from the Phone dialer app tape *#*#7378423#*#* Service info ► Sim lock

  - o Network 5

  - x Network subset 0

  - x Service provider 0

  - x Corporate 0

  - x SIM 0

- Normally, Sony Ericsson phones comes only with a network lock as active.

- **o Network 5** - the phone is Network locked and you have 5 attempts to enter the unlock code. If there is a 0 beside the category where a lock exists, then it means that your phone is hard locked and you can't unlock it by code.

Step 2

- To find the IMEI number dial this code *#06#.

- (i) The unlock code is unique for every phone. You have to provide the IMEI number from your phone to get your unique unlock code.

- When you have your unlock code, insert SIM card from another provider.

- When the phone ask you for SIM network unlock PIN, enter this unlock code.

- (i) If your contract has ended, you can request the code from your provider. Another way is to buy an unlock code.
