INTRODUCTION

Today you are gonna see how to backup your samsung device and others :)

🔧 TOOLS:

- Your phone (1)

    www.iFixit.com

Step 1 — How to backup pictures from your samsung

- Now get your phone and usb cable and go to your computer :)

Step 2

- Now connect them, and then connect it to your computer :)

Step 3

- Now after you've connected the phone after a few seconds your computer will see it and notify you!

- (i) You will get a box that pops up, this is in norwegian, but you will have to press "Open files" or what it might stand?

- ⚠ You might get an notification on your phone that you will need to press "Allow" to let your phone accept your computer!
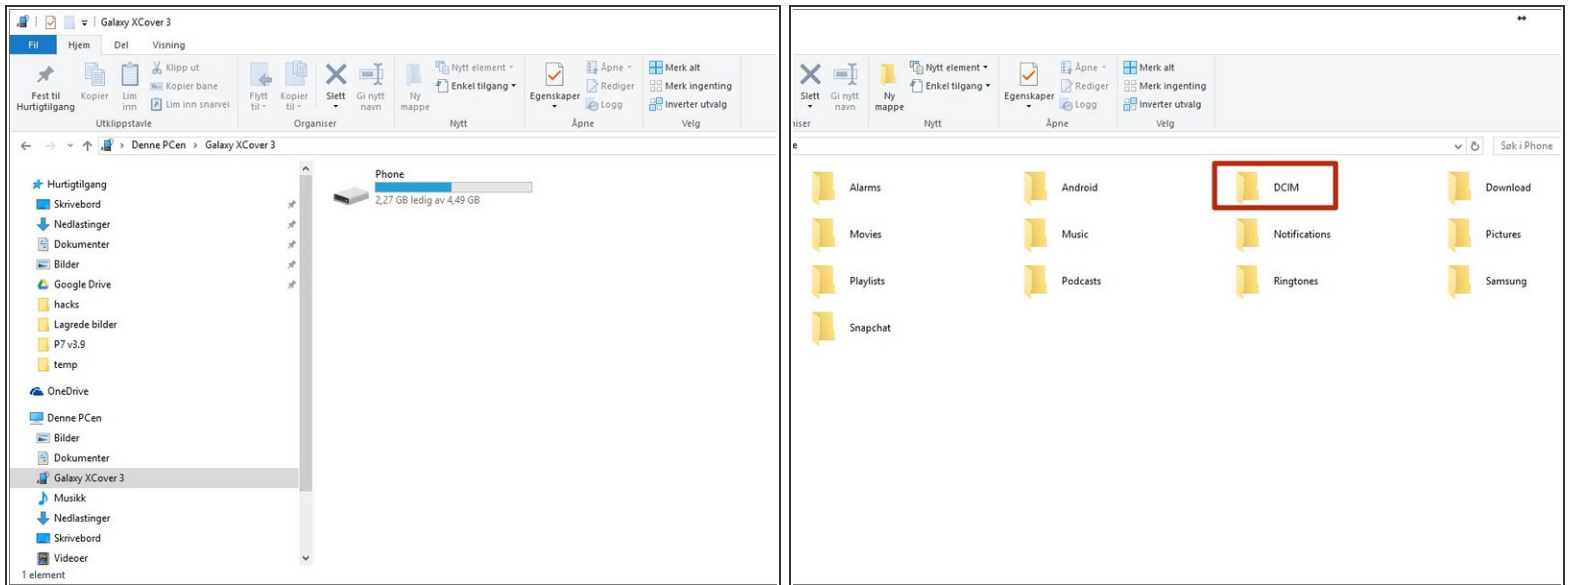

Step 4

- Now that youve gotten your phone and computer connected! we will like to connect it!

- You would like to go into your file explorer! (windows key (downleft on your keyboard) + E)

- (i) You will find your device in there in the red area, close to there, now press it

Step 5

- Now press "Phone" or what it might be where you have your storage on your phone

- Then i would like to go into the folder DCIM folder

Step 6

- Then into camera, if you've been taking pictures.

- Then you just take all the photos. if you want abseloutley everything press "ctrl + A" on your keyboard. then press "ctrl + C"

Step 7

- Go to your desktop and make a new folder. or where ever you would like to have the pictures.

- Go into the new folder and press "ctrl + V" and take your time. it will take a while to download :)

There is not really more to do, than maybe delete the files on the phone and download or take more pictures or such as files! :)
