INTRODUCTION

Paper jams are common in printers and can be easily solved.

Step 1 — How to clear Lexmark Intuition S505 paper jam

- Lift the scanning unit.

Step 2

- Check the duplex unit, located at the rear of the printer, for any paper obstruction. Pinch the top button to remove the unit.

Step 3

- If there is any paper stuck inside, remove it. If not, snap the unit back onto the printer.

Step 4

- Check the front slot, which is located underneath the LED display. If there is any paper, remove it.

Once the paper obstruction is removed, your printer should print smoothly without any problems.
