INTRODUCTION

Performing a force restart should not delete any data, but can be helpful if your iPhone XS is frozen or needs troubleshooting.

Step 1 — How to force restart the iPhone XS

- Quickly press and release the volume-up button (1).
- Quickly press and release the volume-down button (2).

Step 2

- Finally, press and hold the side button (3) until the Apple logo appears, and then release.
- The screen will temporarily go dark as the iPhone shuts down and reboots. Keep holding the button until you see the Apple logo.

You're done!
