## Step 1 — How to jailbreak iOS 9.3.5 on iPad 2

- First step is downloading the phoenixpwn ipa and Cydia Impactor!

- phoenixpwn.com

- cydiaimpactor.com

Step 2 — Open Cydia Impactor

- Plug in your iPad now

- This is what Cydia Impactor looks like

This document was generated on 2019-09-20 06:31:12 AM (MST).

Step 3

- Drag Phoenixpwn ipa over the Cydia Impactor window

- You will be asked for your apple id and password

- Enter your apple id and password

Step 4 — Trust the phoenixpwn app

- You will see the phoenixpwn app on your homescreen now

- It says Phoenix

- To trust the app go to settings > general > device management > your email > trust app

- I don't need a screenshot for this since it is pretty self explanatory

Step 5 — Jailbreaking!!!

- Open Phoenixpwn and click prepare for jailbreak

- It will ask you which offsets to use just click "Use Provided Offsets"

- It might crash a few times... if it does keep trying it until it works

Step 6 — restarting the jailbreak after every reboot

- This is a semi - untethered jailbreak so after every reboot you will need to restart the jailbreak.

- Open the phoenixpwn app and do the same thing you did in step 6.

- The app will expire every 7 days... when it does use cydia impactor to resign the app

To reassemble your device, follow these instructions in reverse order.
