Usage data we process when you use Google

- When you search for a restaurant on Google Maps or watch a video on YouTube, for example, we process information about that activity - including information like the video you watched, device IDs, IP addresses, cookie data, and location.
- Our Privacy Policy contains [further descriptions](#) of the data we process.
- We also process the kinds of information described above when you use apps or sites that use Google services like ads, Analytics, and the YouTube video player.

Purposes of the data processing

We process this data for the purposes described in [our policy](#), including to:

- Help our services deliver more useful, customized content such as more relevant search results, based on your interests derived from such data;
- Improve the quality of our services and develop new ones.

Step 6

Browser-based controls

Cookie settings

Cookies are a vital piece of technology in your browser, allowing websites to make your Internet experience better. For example, when you set a default language on a website, cookies help the site remember your choice.

You can block some or all cookies, but this can cause certain features across the Web to stop working. For example, many websites require cookies to be turned on when you want to sign in.

See your browser's help resources to learn how to adjust your cookie settings.

Google Analytics

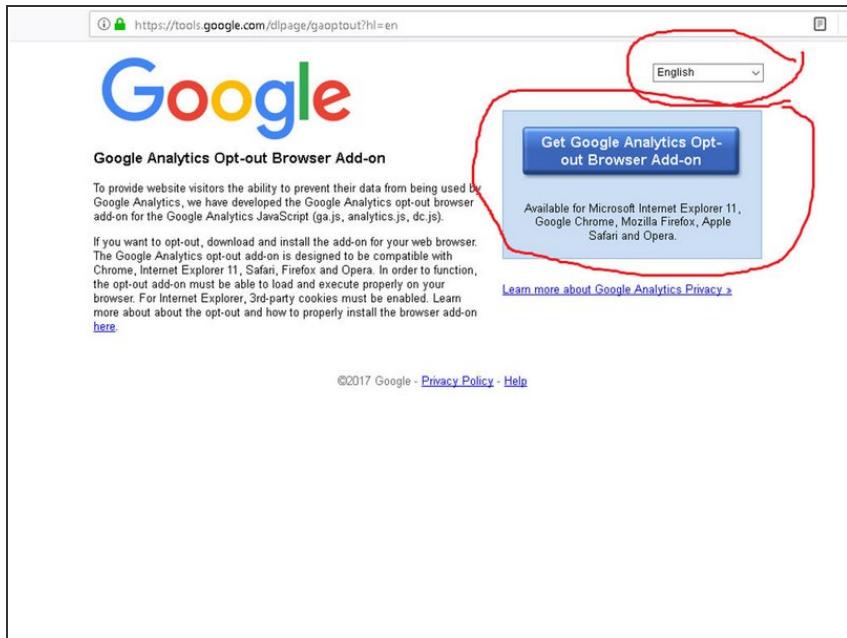

Website owners use data collected by Google Analytics to make their sites work better. However, you can opt out of this data collection by downloading and installing an add-on for your browser.
