## INTRODUCTION

This guide will walk you through how to change the paper and common problems and solutions associated with being low on paper.

## Step 1 — How to load HP Deskjet 6122 paper

- Open the paper tray to see if it is empty.

## Step 2

- If the paper tray is empty, add paper to the tray.
- If there is already paper in the tray, realign the paper so that it fits in the gears, and can feed through properly.

## Step 3

- Ensure that all paper is in the correct tray.
- *(i)* The correct tray is on the upper deck of the printer.

## Step 4

- Run the printer to verify it now prints.
- *(i)* If the paper still does not run through the printer, inspect the paper tray again.

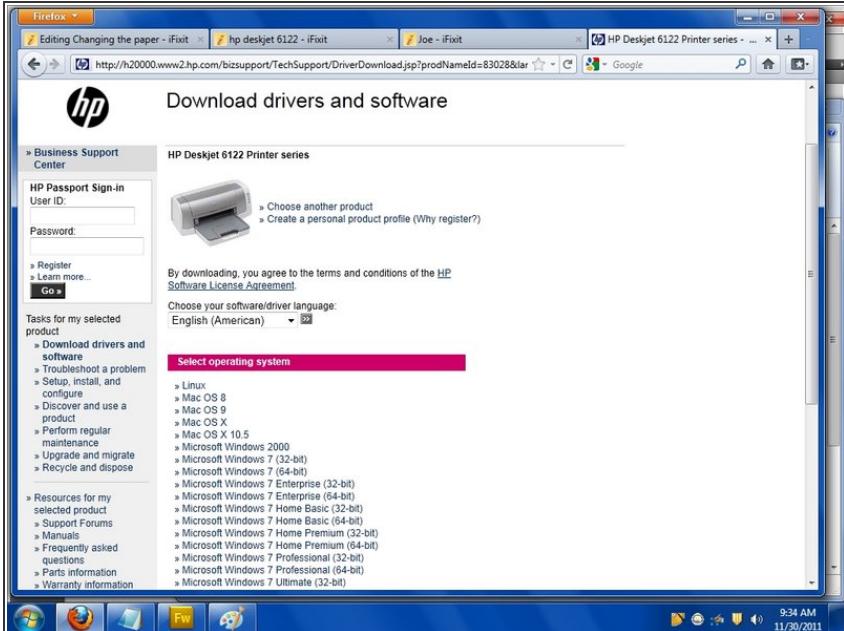

## Step 5

- Remove any paper that looks to be overloading the tray feeder.

**i** Sometimes there can be too much paper in the tray, preventing it from working properly.

## Step 6

- Try to print one last time. If it still fails, consider consulting a page to update drivers.

To reassemble your device, follow these instructions in reverse order.
