

How to make your own oval screwdriver for Jura Ena

Make your own tool to unscrew to oval screw so that you can remove the side covers

Written By: Thierry Helminger

Step 1 — How to make your own oval screwdriver for Jura Ena

- Buy a hollow screw (4 mm hole) like this one for about 40 cts. Strike it with a hammer. Now you can use it to grab the oval screw and use a regular flat or cross screwdriver to remove the oval screw.

To reassemble your device, follow these instructions in reverse order.
