## INTRODUCTION

This video is a step-by-step guide on how to do this modification. Great alternative when your original battery dies, and new one is just too expensive!

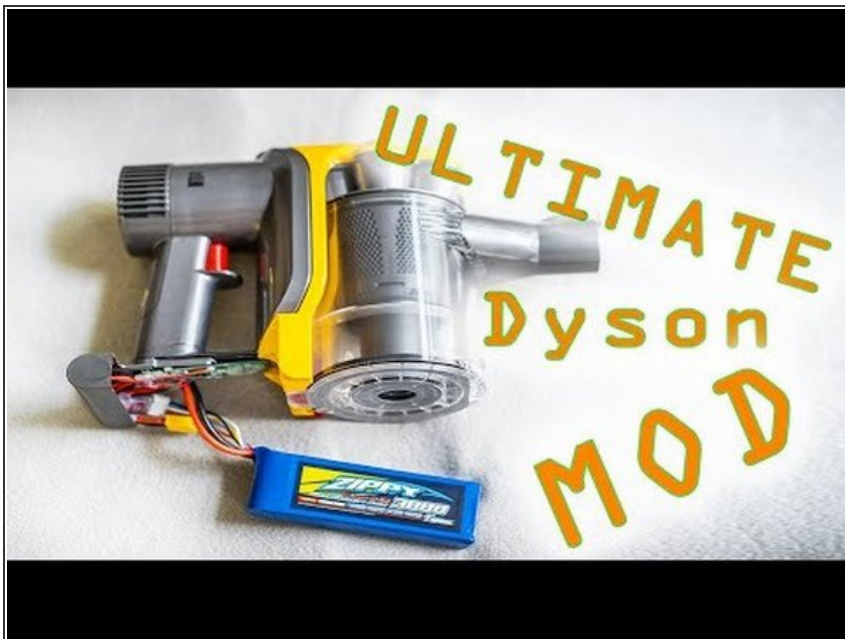

It will extend the usage time of the Dyson vacuum cleaner according to the battery you use! :D

### TOOLS:

- [Soldering Iron](#) (1)
  - [Solder](#) (1)
  - [Flathead Screwdriver](#) (1)
  - [Liquid Soldering Flux](#) (1)
-

## Step 1 — How to modify Dyson DC30 vacuum cleaner to use LiPo batteries

- Check the video out, it's awesome!

Let me know how you like my modification, or if you have any suggestions to make it even better!
