

# How to remove the rear view mirror from the windshield

Removing The Rear View Mirror From The Windshield.

Written By: mason

## INTRODUCTION

Just a quick demonstration of how the rear view mirror un-mounts from the windshield.

This is a 2005 Hyundai Santa Fe

## Step 1 — How to remove the rear view mirror from the windshield

- Just Grip, Wiggle, And Push Down.

## Step 2

- Be careful removing this cover. It holds the cord plug in, and removing it will cause the mirror to fall.
- Once the cover is removed and the cord is unplugged that's it. The mirror is now free from the windshield.

To reinstall you need to remove the plastic mount cover, then just slide the assembly back into the mount, and reinstall the cover.
