

# How to repair Nova Waffle iron (waffle maker)

How to repair grandma's Nova waffle maker.

Written By: Pierre

## INTRODUCTION

Make the very best waffles with grandma's waffle iron.

## Step 1 — Check the electrical connections in the contact box.

- Open this box to check the connections.

## Step 2 — Open one side of the device.

- Open one side of the device.
- Remove the protective plate.
- Remove the old mica flakes.

## Step 3 — New clamps

- Place new cable ends and cable shoes.

## Step 4 — Mica

- Cut new mica sheets to size. These form an electrical insulator and at the same time a heat conductor with the protective plate.
- Fit the protective plate and fit this side back onto the waffle iron.
- Repeat these steps on the other side of the waffle maker.

## Step 5 — Assemble the whole.

- Reinstall the device in reverse order.
- Now getting started ... baking waffles in grandmother's way !!  
Tasty.

To reassemble the device, follow these instructions in reverse order.
