

# How to replace the door knob

Replacing the safety door know by yourself

Written By: Z.Heng

By Z.Heng

## **TOOLS:**

- [New Item \(1\)](#)
- [New Item \(1\)](#)

## Step 1 — Remove the screw holding the handle

- It is advisable to work with two people, one holding the outer handle on the outside and the other unloading the screw on the other side.
- Remove the two screws.

## Step 2 — Remove the handle

- Use pry bar carefully pry around, you can remove both sides of the door handle.

**⚠** There is usually a plastic washer between the handle and the door, taking care not to damage it.

**⚠** There will be a metal square shaft connected between the handle. Be careful not to lose it when removing the inside handle because the shaft is inside and outside.

### Step 3 — Pay attention to the square shaft

③  Pay attention to the installation direction of this square shaft. Do not knock it off when removing the handle.
