

Huawei Ascend Teardown

I took apart the Huawei Ascend to see if there was anything wrong with the motherboard and anything I went through to get to the motherboard.

INTRODUCTION

My pictures don't clearly show what to do, but my captions will help you understand what to do better.

TOOLS:

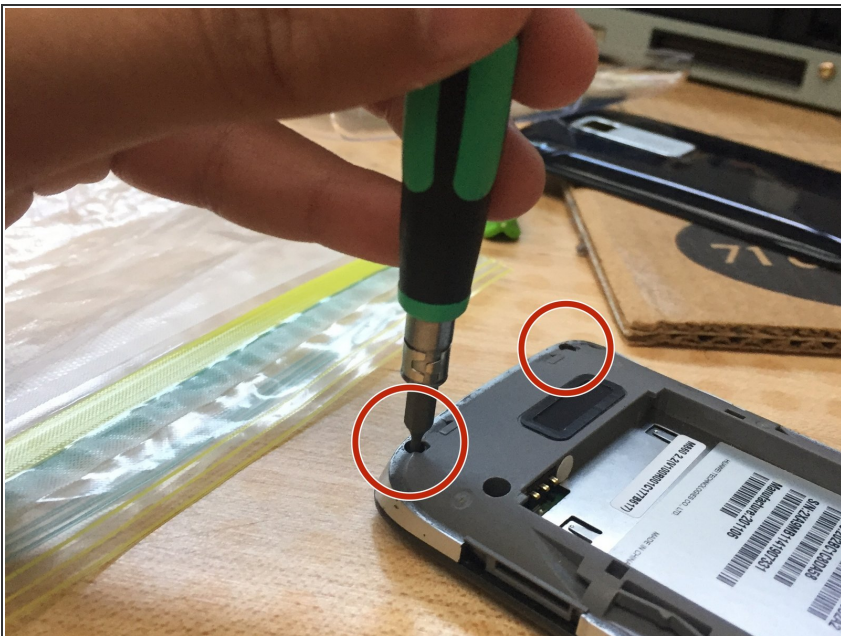

- [Phillips #0 Screwdriver](#) (1)
 - [T15 Torx Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Opening the phone

- First you want to flip the Huawei Ascend over to its back side.
- When you are done flipping it over you want to take the back part of the phone off.

Step 2 — disassembling the phone

- You want to use a Phillips 0 Screwdriver to remove 4 little screws.
- The screws are found on the top corners of the phone and the bottom corners of the phone.

Step 3 — disassembling the phone

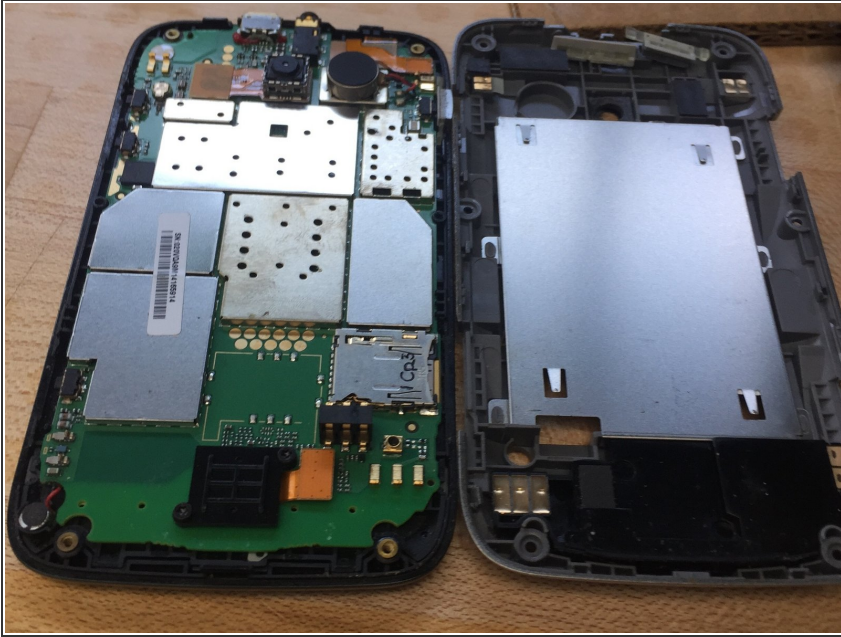

- Now you want to take the last two screws from the right and left side of the phone to separate the front from the back.

Step 4 — separating the two phone parts

- Now you want to use a spudger to separate the front from the back.

Step 5 — the motherboard

- Now you should see the motherboard and other parts like camera.
