

Huawei Ascend G610 Replacement Rear Camera Replacement

Follow this guide if your camera needs to replace the rear camera

Written By: Smilzo

INTRODUCTION

Follow this guide if your camera needs to replace the rear camera

Step 1 — Rear camera replacement

- Remove back cover

Step 2

- Remove battery

Step 3

- Remove the 9 side screws with a Phillips screwdriver, beware a blanket with a sticker
- The 10th screw that is shorter is centrally located near the Sim card slot

Step 4

- With the help of a thin instrument, unhook the central structure anchored to the external profile

Step 5

- Remove the central structure
- Unhook the camera connector indicated by the red arrow and replace with the new one

To reassemble the device, follow these instructions in reverse order.
