INTRODUCTION

An easy process to replace a faulty or just insert a new battery.

Step 1 — Battery

- Place the tablet on a flat clear surface to keep the screen safe.
- Slide the larger portion of the back cover off the tablet.
- This will reveal the battery.

Step 2

- Lift the battery out with your finger.
- ⚠ Make sure you use the slot near the bottom of the device as shown. Trying to lift from anywhere else will not work and may damage the battery or the device.

To reassemble your device, follow these instructions in reverse order.
