

# Huawei P20 Lite Display (with frame and battery) Replacement

A guide how to replace the LCD including frame and battery for the Huawei P20 Lite.

Written By: Harvey

 **TOOLS:**

- [iFixit Opening Tools \(1\)](#)
- [Phillips Screwdriver \(1\)](#)
- [Metal Spudger \(1\)](#)
- [Suction Handle \(1\)](#)

 **PARTS:**

- [02351VPR - Huawei Display Assembly with frame and battery \(1\)](#)

## Step 1 — Remove SIM Card Tray

- Turn the phone off and remove the SIM Tray before beginning the repair

## Step 2 — Remove Battery Cover

- Use a suction cup and pick to get between the battery cover and frame.
- Work the pick all the way around to loosen the adhesive and remove the cover.
- Flip the cover carefully to the right side of the phone, there is a cable attached to the back cover for the fingerprint ID sensor.

This document was generated on 2019-09-18 06:11:00 PM (MST).

## Step 3 — Release Fingerprint ID Cable

- Release the ZIF connector to remove the Fingerprint scanner cable from the back cover.

## Step 4 — Remove Upper Screws

- Remove the 8 upper screws that hold the metal covers.
- One of the screws may be covered with a white dot sticker. Remove the dot to access the screw.

## Step 5 — Remove covers for cables and mainboard

- Once the screws have been removed (as described in the previous step) the two lower metal covers can be removed.
- The upper cover can be removed by prying the upper right corner free (2nd picture).

## Step 6

- On the left side in the frame, is a small plastic retainer. Remove this and transfer to the new frame.

## Step 7 — Disconnect cables

- Disconnect the battery connector from the mainboard.
- Remove the dual camera, the front camera and the two flex cables. The Wi-Fi antenna cable can also be disconnected

## Step 8

- Using a spudger, carefully pry the mainboard up on the upper right corner to release it from the frame.

## Step 9

- At the bottom of the phone, there are seven screws that need to be removed.
- Underneath the cover is the daughterboard

## Step 10

- Using the iOpener or a similar tool, loosen the cover on the right side, by prying between the cover and the frame.
- At the top of the cover (2nd picture) use the iOpener to pry up the cover to remove it from the frame.
- Underneath the cover is the daughter board containing the charger port and headphone jack. Disconnect the cable attached to the daughter board.
- Pry the daughter board to remove it from the frame, it is lightly glued, and can be reused in the new frame.
- Repeat the steps in reverse to reassemble the phone.

To reassemble your device, follow these instructions in reverse order.
