

Huawei P20 Pro Back Glass Replacement

Replace a scratched or shattered back glass assembly on a Huawei P20 Pro

Written By: cPix

INTRODUCTION

If the back glass is broken on your Huawei P20 Pro, you must replace this back glass which serves as a battery cover.

TOOLS:

- [New Item \(1\)](#)
- [New Item \(1\)](#)

PARTS:

- [New Item \(1\)](#)

Step 1 — Back Glass

i Put your phone on a clean work surface with good lighting.

! If your back glass is shattered use clear tape to tape over the shattered glass. Use safety glasses to prevent your eyes from glass shards.

Step 2

- Gently but firmly insert a thin iSesamo tool about an inch between the broken back glass and the frame.
 - ⚠ Do not insert the iSesamo by the camera! There is a cable by the camera that may be cut if you insert the iSesamo there!
- Slice all the way around the phone's edges to cut all of the adhesive.
 - ⚠ Do not slice around the camera area! There is a cable by the camera that may be cut if you slice around there with the iSesamo.
- ⓘ It is also possible to slightly heat the area with a hair dryer to loosen tough adhesive.

Step 3

- Open the phone like a book and set the rear glass assembly aside.
- Disconnect the fingerprint sensor.
- Put down some 4 mm Tesa tape to act as replacement adhesive before reassembling your device.
- Remove the fingerprint sensor from the broken/scratched back glass and reconnect the fingerprint sensor pad to your new back glass before closing the device.

Step 4

- Apply your new back glass assembly onto your phone. Apply some light force onto the back of the phone so that the adhesive sets.

Congratulations! You have replaced the back glass of your Huawei P20. Clean with a microfiber cloth for a perfect finish without scratches or fingerprints.
