Step 1 — Separate the back glass and the phone

- Heat the backglass with a heat gun.

- Use a suction cup and a card to gently remove the back glass.

⚠ Don't hesitate to heath again if there is any resistance.

Step 2 — Disconnecting the fingerprint.

- Disconnect the fingerprint cable.

⚠ You have to open the lock of the cable on the back glass.

Step 3 — Separate the fingerprint and the back glass

- Use the heat-gun to heat the fingerprint.

- Push the fingerprint to remove it from the backglass

- It's done.

To reassemble your device, follow these instructions in reverse order.
