

Huawei Y300 Motherboard Replacement

Written By: murtaza

 **TOOLS:**

- [Tweezers \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Motherboard

- Lift open the back cover
- Disconnect the Battery
- Disconnect the SIMcard
- Remove the MicroSD card from its slot

Step 2

- Remove the 8 screws on the back and place them on the magnetic mat

Step 3

- Pull of the back cover using the plastic opening tool

Step 4

- Carefully detach the LCD and speaker ribbons from the Motherboard using the pliers

Step 5

- replace the motherboard with a new one and re-attach the ribbon wires to the motherboard

To reassemble your device, follow these instructions in reverse order.
