TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Removing the Panel

- To Remove the back, use a pry tool around the edges of the backing.
- Best places to pry the backing away
 - ⚠ Try Not to snap the backing plastic
- Camera
 - ⚠ Try Not to scratch this
- Speaker Grills
 - ⓘ They are not attached to the motherboard so the back panel can pop right off

To reassemble your device, follow these instructions in reverse order.
