- Small Chain Nose Pliers (1)

This document was generated on 2019-09-21 11:24:23 AM (MST).

Step 1 — open up case

- Unscrew the screws on the outside.

- Slide the top cover a bit to the back, and lift it from the enclosure.

Step 2 — remove power supply
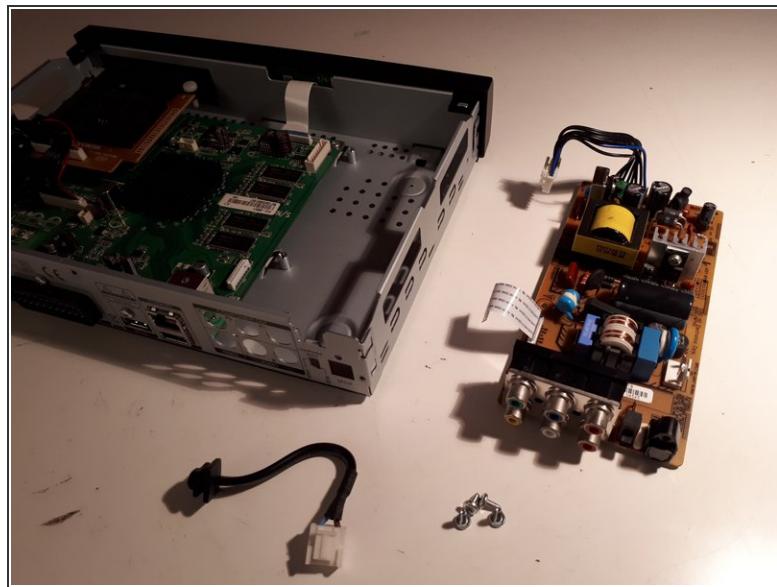

- Remove the various pieces holding in the power supply.

  - Remove power cable (already cut of in the photo).

  - Unscrew screws.

  - Disconnect mainboard cables.

- Remove the power supply from the enclosure.

Step 3 — remove front
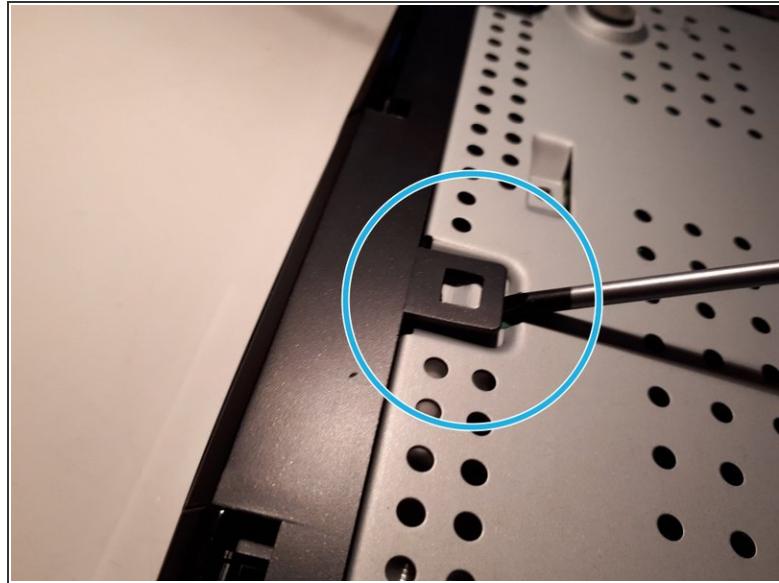

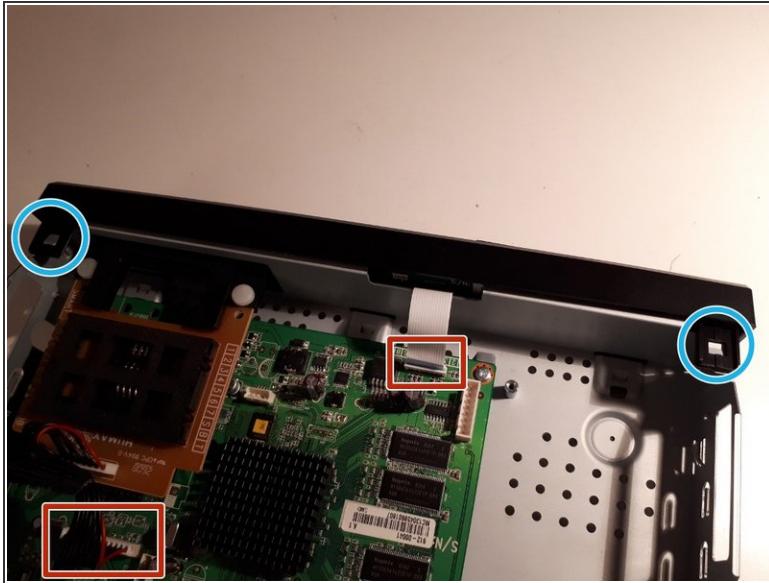

- Disconnect the cables connecting the mainboard to the front panel.

- With a flathead screwdriver, unclip the 2 topside clips, and 3 clips on the bottom of the enclosure, and the front will detach.

Step 4 — disassemble front
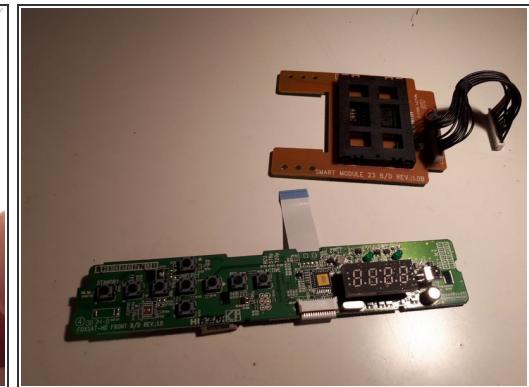

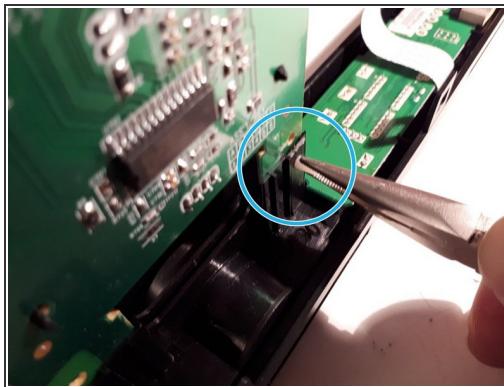

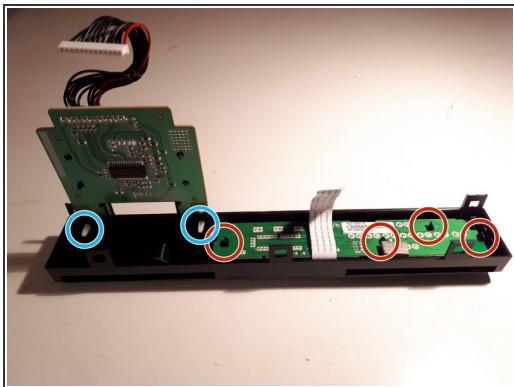

- Unclip the 4 clips from left to right, and remove the panel.

- With the pliers, clamp the white connector and push it through.

Step 5 — remove mainboard
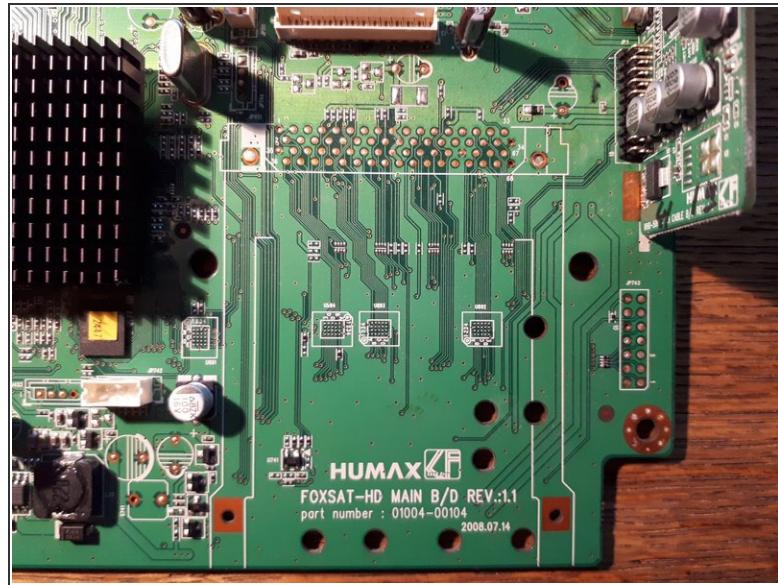

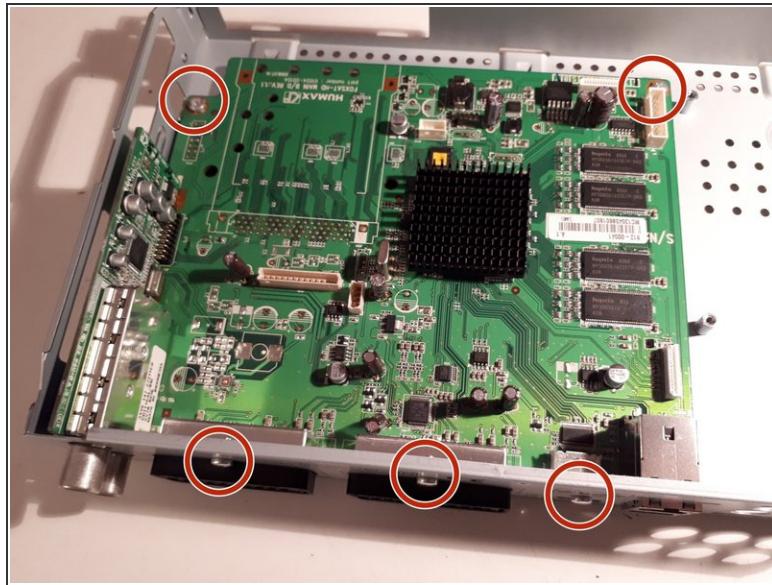

- Unscrew the screws and remove the mainboard from the case.
