INTRODUCTION

Use this guide to replace the RAM in your IBM ThinkPad T30

TOOLS:

- Phillips #0 Screwdriver (1)

PARTS:

- PC2700 256 MB RAM Chip (1)

This document was generated on 2019-10-19 11:28:57 PM (MST).
Step 1 — Battery
ⓘ Make sure the ThinkPad is off and the power supply is unplugged.

● Flip the ThinkPad upside down with the bottom facing you.

● Slide the latch on the underside of the ThinkPad to the right into the unlock position.

● While holding the latch in the unlock position, lift the battery out with your other hand.

Step 2 — RAM

● Remove the 4 mm Phillips #0 screw located on the panel on the bottom right of the ThinkPad.

● Lift up the cover and set it aside.

Step 3

- Locate the four white tabs. There are two sets of white tabs, the top two holding the first RAM stick and the bottom holding the second RAM stick.

- Removing one set at a time, press down on the white tabs at the same time. The RAM stick will pop out of place.

Step 4

- Lift out the two RAM sticks.
