

# Infant Optics DXR-8 Camera Disassembly

This guide shows you how to disassemble the camera included with the Infant Optics DXR-8.

Written By: Jonathon Dowell

---

# INTRODUCTION

Disassembling of the camera to allow access to the speaker, antenna, and power switch.

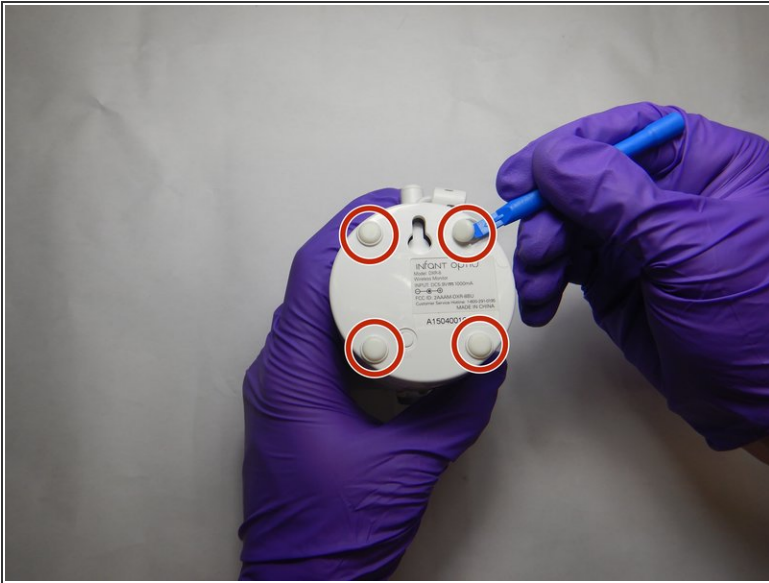

---

## TOOLS:

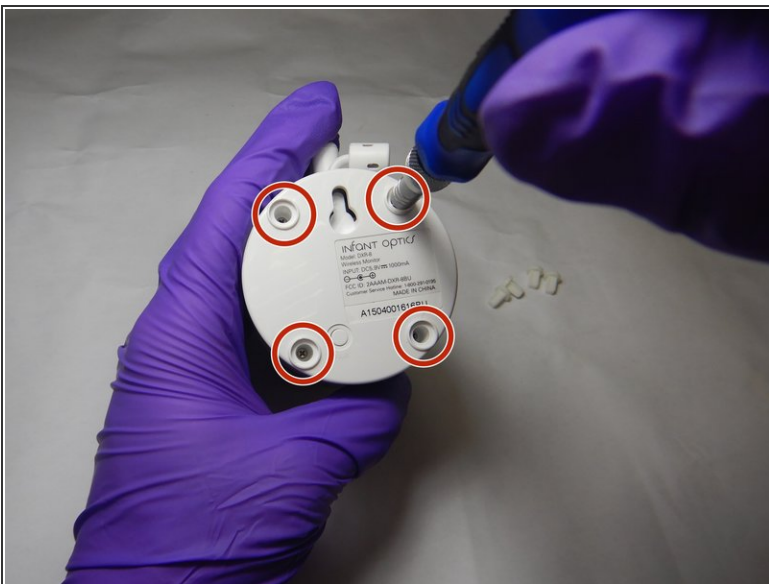

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Infant Optics DXR-8 Camera Disassembly

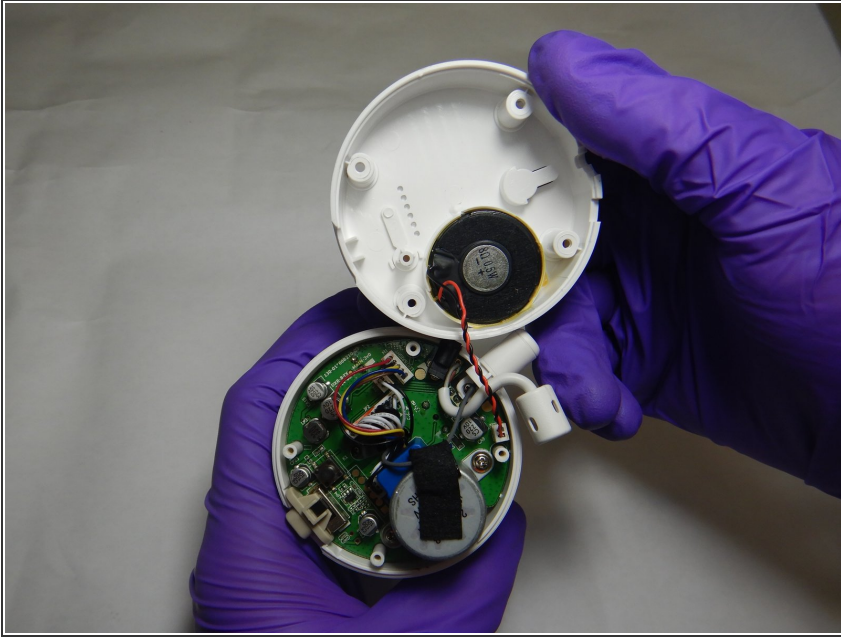

- Position the camera with bottom facing toward you.
- Using the plastic opening tool, remove all four rubber ends from the bottom of the camera.

## Step 2

- Remove the four 4 mm screws beneath rubber ends using the Phillips #00 screwdriver.

### Step 3

- Open the bottom of the camera to reveal the circuit board and speaker.

To reassemble your device, follow these instructions in reverse order.
