Step 3

- Use a spudger to separate the back cover from the laptop.

- ⓘ Start from one corner and work your way around the edge of the cover.

- ⚠ Be careful not to bend or crack the back cover.

Step 4

- All hardware components should be exposed.

Step 5 — Hard Disk Drive

- Unscrew three 3mm screws with a Phillips #0 screwdriver and remove them.

- These screws hold the hdd and removing these screws will make it easier to remove it.
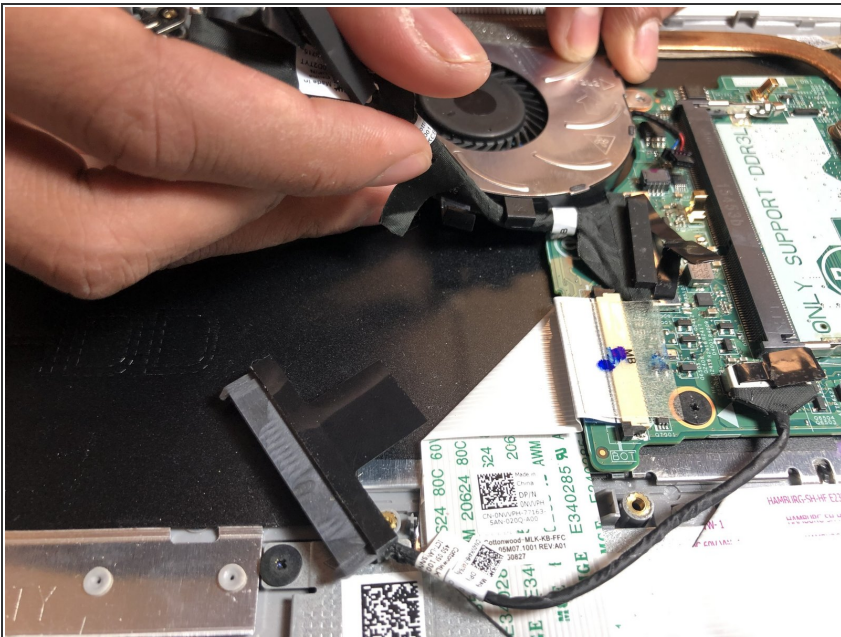

Step 6

- Lift the hard drive from the left side. Be careful not pull on it.

- Pull the SATA cable that's connect to the hard drive and then carefully place the cable on the side.

Step 7 — Fan

- Carefully pull the fan adapter labelled one.

Step 8

- Pull the wire from the hook to make it easier to take the whole fan out.

Step 9

- Remove one 5mm screw using the Phillips screw.

- After the screw is extracted use your hands and carefully take the fan out.

To reassemble your device, follow these instructions in reverse order.
