INTRODUCTION

If you've got a luxury car like an Audi A5, you'd probably want full-on LED lights to complement that luxury car. This is a easy way to change out your stock license plate lights into some fresh looking LED bulbs.

⚙ **PARTS:**

- LED license plate bulb for European cars (1)

## Step 1 — license plate lights

- Get a Philips screwdriver and remove the screws from the license plate lamps.

Step 2

- Remove the stock license plate bulb.

Step 3

- Directly replace it with the new Error Free LED bulb.

- Remember to have the LED emitter facing outwards, towards the license plate lens.

Step 4

- Put the license plate lamp back and screw in the assembly.

- Repeat on the other side.

Installing this LED license plate bulb is extremely easy and straightforward. Make sure to test everything to see if it works.
