INTRODUCTION

The LED display is how you communicate with your Instant Pot. This guide will show you how to remove the display from the front of your device.

🔧 TOOLS:

- T15 Torx Screwdriver (1)
- Phillips #1 Screwdriver (1)

Step 1 — LED Display

- Open the lid by turning it counter-clockwise and lifting up.

- Remove the inner pot.

Step 2

- Turn the Instant Pot upside down.

- Remove the single 12-mm screw by using the T-15 head screwdriver and turning it counter-clockwise.

- Turn the plate counter-clockwise and lift it off the Instant Pot.

Step 3

- Remove the three 19-mm screws in the black plastic base's edge using the PH-1 head screwdriver and twisting counter-clockwise.

Step 4

- Pull the power cord out of its slot.

- Pull up on the edge of the black plastic base to remove the base.

Step 5

- Disconnect the two green-striped yellow wires that are connected onto the bottom of the heating element. Use a PH-1 head screwdriver and turn counter-clockwise to remove the 10-mm screw holding them in place.

- (i) Be careful not to lose the small washer that comes with this screw.

- Pull up on the cn101 connection to detach the LED display from the motherboard.

Step 6

- Lift the silver outer shell off of the top black ring.

Step 7

- Remove the two 10-mm screws connecting the LED display to the outer shell using a PH-1 head screwdriver and twisting counter clockwise.

- Pull out the LED display by pulling on it gently.

To reassemble your device, follow these instructions in reverse order.
