

# JBL Clip Plus Speaker Replacement

The speaker is the main part of the JBL Clip+. This guide will show how to remove this.

Written By: Noah Pauk

## INTRODUCTION

The speaker is the main part of the JBL Clip+. This guide will show how to remove this.

### TOOLS:

- [Solder and Desolder Kit](#) (1)
- [Tweezers](#) (1)  
**Angled Tweezers**
- [iFixit Opening Tools](#) (1)
- [Phillips #2 Screwdriver](#) (1)

## Step 1 — Battery

- Use the angled tweezers to carefully pull the rubber bumper off the back side of the device

## Step 2

- There will be three 6mm philips head screws under that rubber bumper, remove these three screws.

## Step 3

- The back cover should lift open easily and the components should be visible.

## Step 4

- The battery is adhered to the back cover of the JBL Clip Plus, slowly lift the battery away from the case, using a spudger to pry the battery away from the adhesive.

## Step 5

- Remove the three 7mm philips head screws on the outer edges of the device.

## Step 6

- Use the plastic prying tool to gently remove the face of the speaker from the body.

## Step 7

- Use the spudger tool to gently scrape away the adhesive holding in the microphone.

 When working with electronics, it's important to choose a tool that's ESD-safe to avoid accidental damage to the device. The regular black nylon spudger or a plastic opening tool should be used whenever possible.

## Step 8

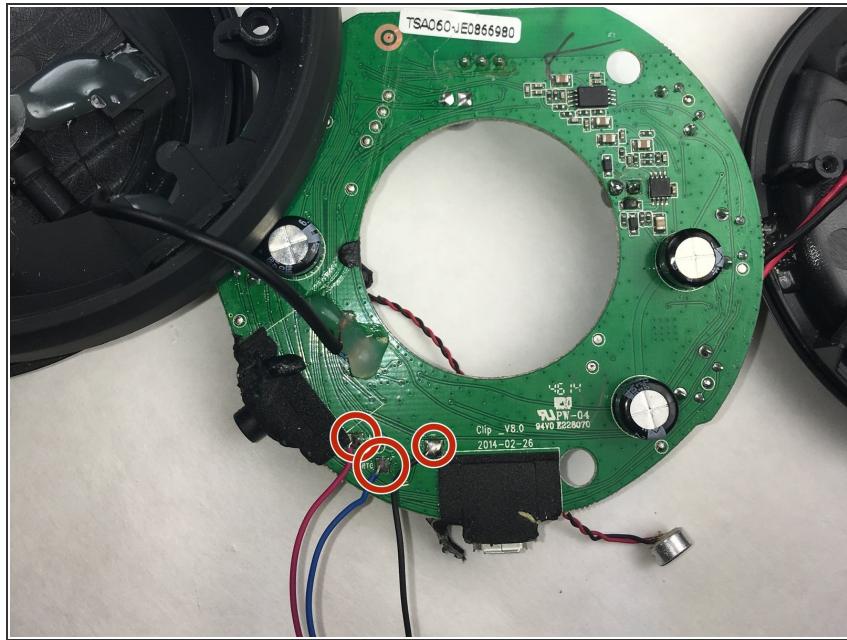

- Gently push the motherboard away from the microphone, this will allow you to remove the microphone.

## Step 9

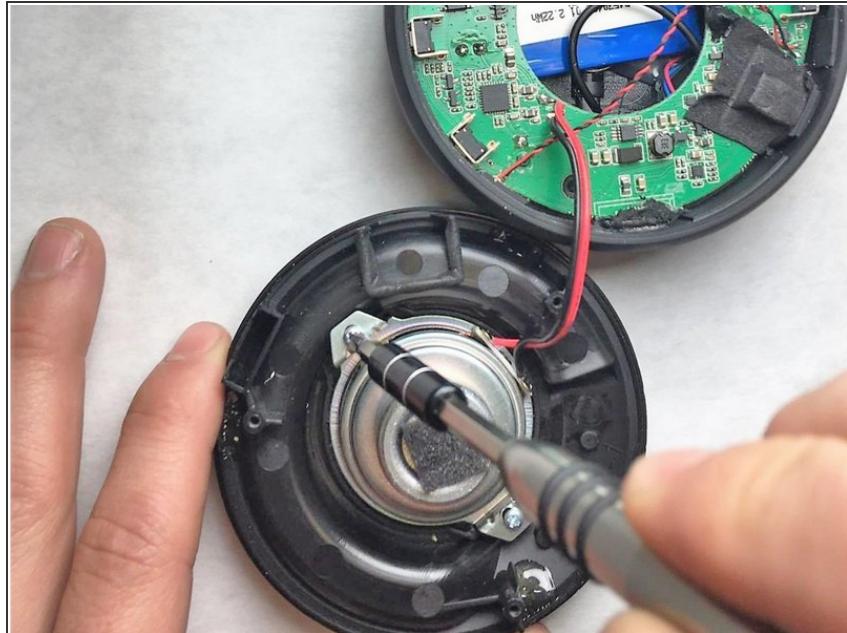

- Gently push the motherboard out from the frame of the JBL Clip Plus, this requires some force.

## Step 10

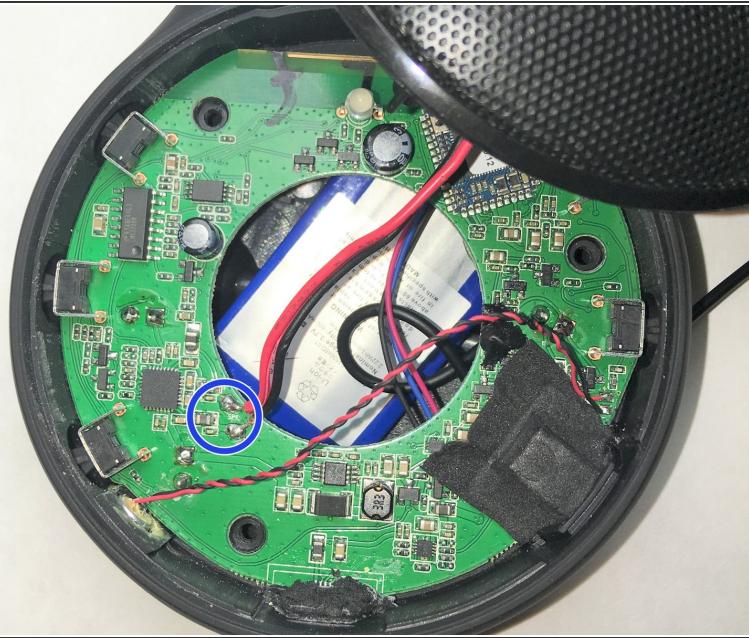

- There are three solder points that need to be desoldered.
- If you need help with desoldering refer to [How to Solder and Desolder Connections](#) help. After these are removed the battery should be free.

## Step 11 — Speaker

- There are two #1 philips head 4mm screw fastening the speaker to the body, remove these.

## Step 12

- Remove the solder on the motherboard.
- If you are unsure how to desolder these connections refer to : [How To Solder and Desolder Connections](#)

To reassemble your device, follow these instructions in reverse order.
