

Juul Teardown

Tear down of small vape pen, specifically a Juul

Written By: ashley.woods138

Step 1 — Juul Teardown

- Slide the plastic case out of the metal housing by sliding the components towards the flat end of the JUUL.
- Remove the magnet and rubber top from the plastic case.
- Slide the battery and IC board out of the plastic case. NOTE: The battery and IC board are connected. Apply gentle pressure when removing them.

To reassemble your device, follow these instructions in reverse order.
