

# KRUPS Milk Foamer Type XL2000 Disassembly

Make a full disassembly of the KRUPS Milk Foamer, without damaging parts and using standard tools.

Written By: Joost Dommissé

## INTRODUCTION

In this Fast Fix disassembly, we will teach you how to take apart your KRUPS milk foamer. Whether it is to fix a small problem or just out of curiosity, this guide will help you make a full disassembly using standard tools and making sure no parts are damaged in the process.

### TOOLS:

- [TR10 Torx Security Screwdriver](#) (1)
- [T20 Torx Screwdriver](#) (1)
- [Variable Sized Monkey Wrench](#) (1)

## Step 1 — KRUPS Milk Foamer Type XL2000 Disassembly

- Take off the plexiglass top.
- Remove the white milk spinner from the inside of the foamer.

## Step 2

- Remove the 12mm Torx screws (x3) from the bottom of the foamer using a Torx TR10 screwdriver.

## Step 3

- Open the bottom of the foamer.

## Step 4

- Take out the grey and white power cables by pulling out the slide connectors from the base.

## Step 5

- Remove the 16mm Torx screw in the middle of the base using a Torx TR20 screwdriver.
- Take off the black bottom from the main body.

## Step 6

- Grab the power connector in the centre of the black bottom with a monkey wrench.
- Twist the connector clockwise to remove the center power socket.

## Step 7

- Remove the electromotor-plug using tweezers.
- Make sure to squeeze the small tab on the side of the plug to release it easily.

## Step 8

- Remove the electromotor by hand.

## Step 9

- Remove the rubber housing from the electromotor.
- Remove the small rubber cap from the other end of the electromotor.

## Step 10

- Press on the two white clips to release the button case.
- *i* Push one side out first to make it easier.

## Step 11

- Pull out the green ribbon cable through the rubber cover.

## Step 12

- Pull off the rubber button caps from the button case.

## Step 13

- Using tweezers, pull off the rubber cover from the base.
- ⓘ Slide one side of the tweezers under the rubber to get a grip.

## Step 14

- Using your thumbs, push off the bottom plastic cover from the body.
- ⓘ Make sure to push and rotate frequently. Pushing on multiple points around the edge of the part allows it to come off easier and without breaking.
- ⚠ Due to this part being glued in, it takes some force to take it off.

## Step 15

- The product is now fully disassembled.

To reassemble your device, follow these instructions in reverse order.
