

# Keurig B60 Power Cord Replacement

This guide demonstrates how to replace a faulty power cord.

Written By: Jake Wynn

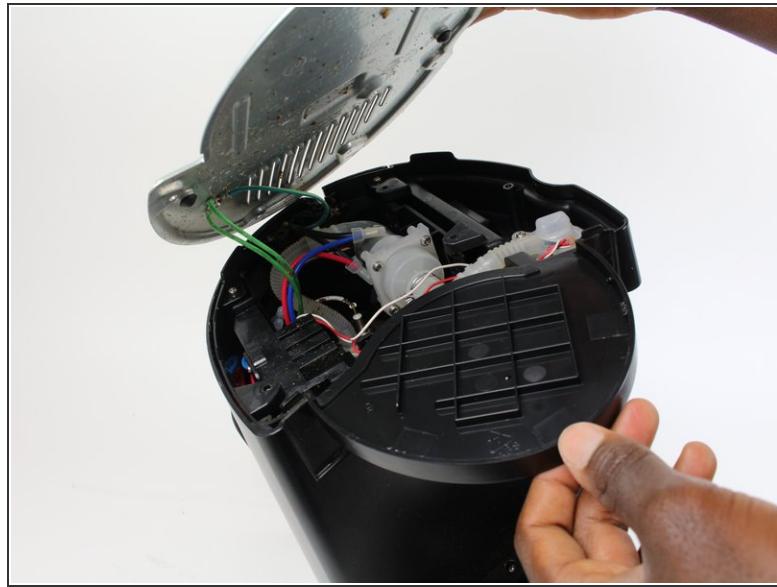

## INTRODUCTION

This replacement involves removal of the bottom panel. Certain tools are required.

### TOOLS:

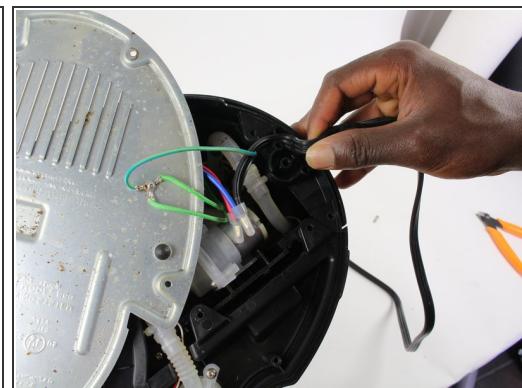

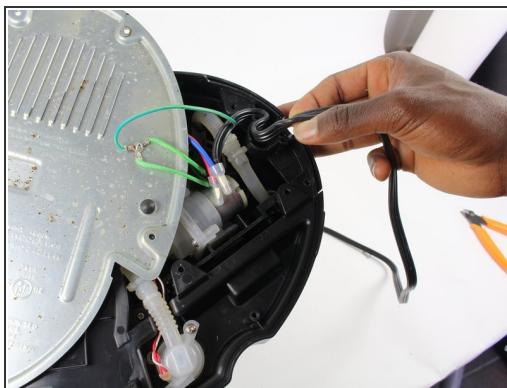

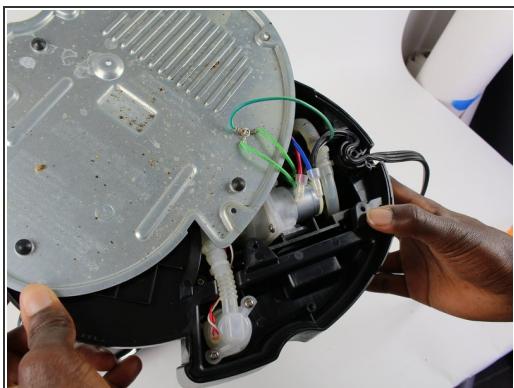

- [Phillips #1 Screwdriver](#) (1)
- [Flush Wire Cutters](#) (1)
- [Portable Soldering Iron](#) (1)

## Step 1 — Power Cord

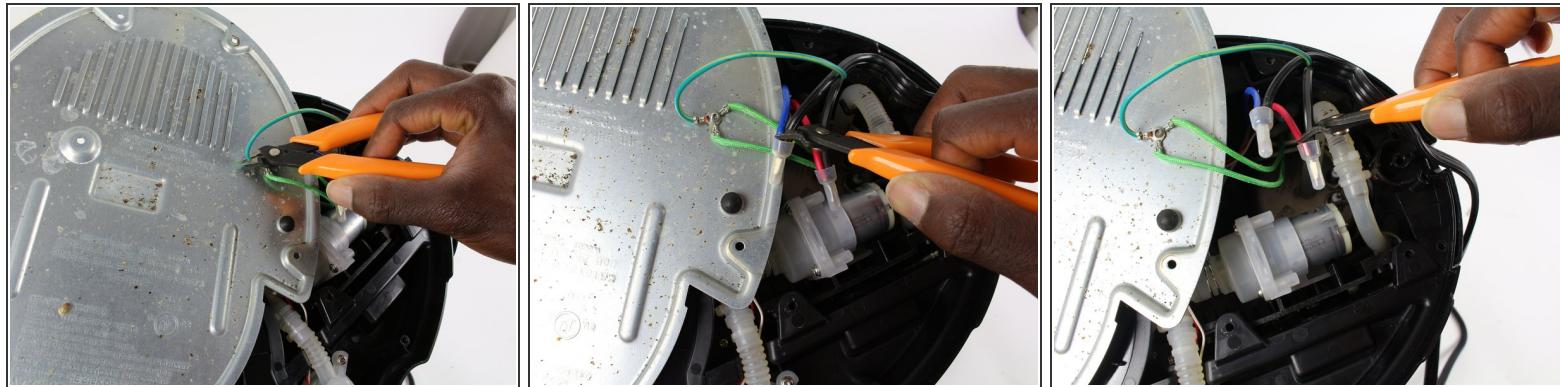

- Ensure Keurig is powered off and unplugged.
- Turn the Keurig over, and unscrew five 25.5 mm Phillip #1 screws, and remove bottom panel.

## Step 2

- Unwind the Power Cord from the wire channel

## Step 3

- Make three cuts along the wires shown
- Solder the Power Cord Replacement to the same wire attachments

To reassemble your device, follow these instructions in reverse order.
