

Keurig B60 Puncture Needle Replacement

This guide demonstrates how to remove and replace a clogged or damaged puncture needle.

Written By: Jake Wynn

INTRODUCTION

Replacing the Puncture Needle is similar to the Handle Replacement, but requires a couple extra steps outlined below.

TOOLS:

- [T15 Torx Screwdriver](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Handle

- Lift the handle

Step 2

- Locate and remove the two 9.5 mm Torx T15 screws on both sides of the handle.

Step 3

- Remove the broken handle and replace with the new one

Step 4 — Puncture Needle

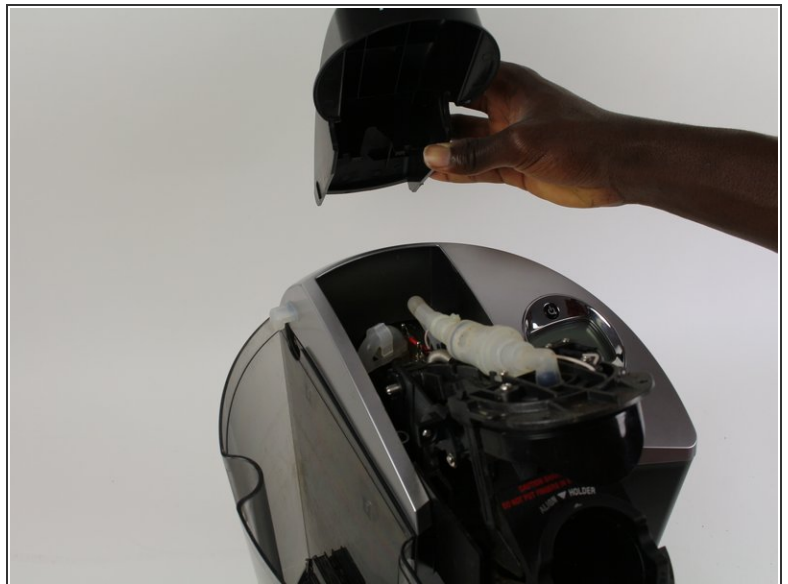

- Locate and remove the two 9.5 mm Phillips #1 screws.
- Remove the plastic ring around the K-Cup Pack Holder

Step 5

- Remove the two 9.5 mm Phillips #1 screws on the underside of the lid.

Step 6

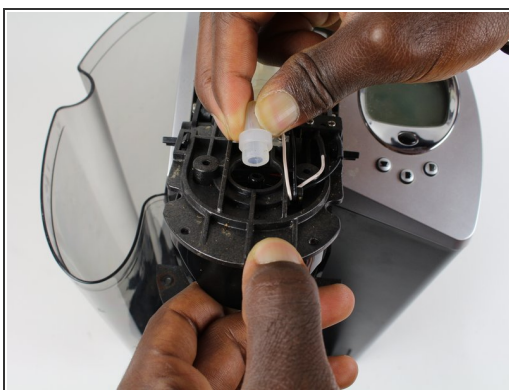

- Detach the lid from the Keurig.

Step 7

- Locate and remove the two 9.5 mm Phillips #1 screws on the top of the puncture needle.

Step 8

- Squeeze and pull on the hose to remove it from the Puncture Needle
- Puncture needle should now be exposed

Step 9

- Remove the Puncture Needle Assembly from Keurig

To reassemble your device, follow these instructions in reverse order.
