

# Keurig K55 Water Filter Replacement

How to replace the water filter in a Keurig K55.

Written By: William O'Brien

---

## INTRODUCTION

Removal and replacement of the Keurig K55 water filter.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Water Filter

- Grab the lid of the water reservoir on the left side of the Keurig.
- Lift up to remove the water reservoir lid.

## Step 2

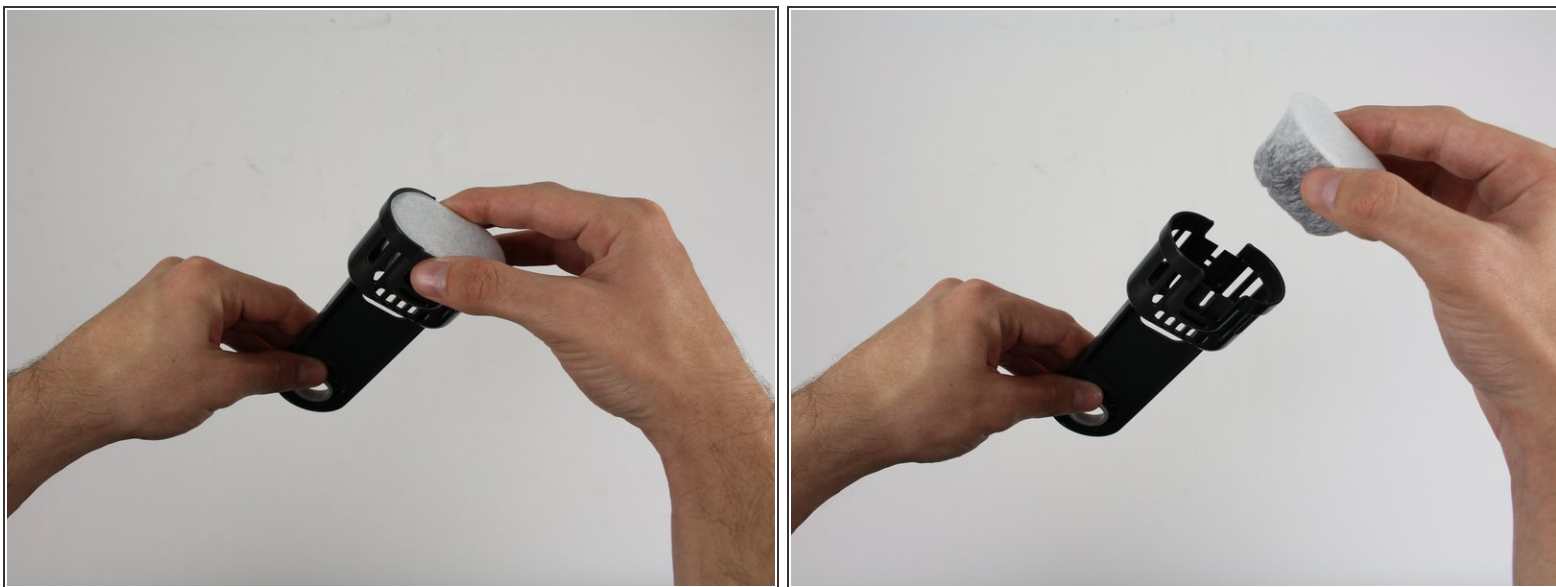

- Grab the water filter on the inside of the reservoir.
  - Remove filter by pulling straight up.
- i** Pulling the filter out may require a bit of effort.

## Step 3

- Pinch both sides of end cap on the large end of the filter.
- With both tabs compressed, pull the cap off of the housing.

## Step 4

- Remove exposed filter.

To reassemble your device, follow these instructions in reverse order.
