

# Keyboard by why! Replace W253EU (German)

Replace keyboard after damage or to exchange it with a specific model.

Written By: Felice Suglia

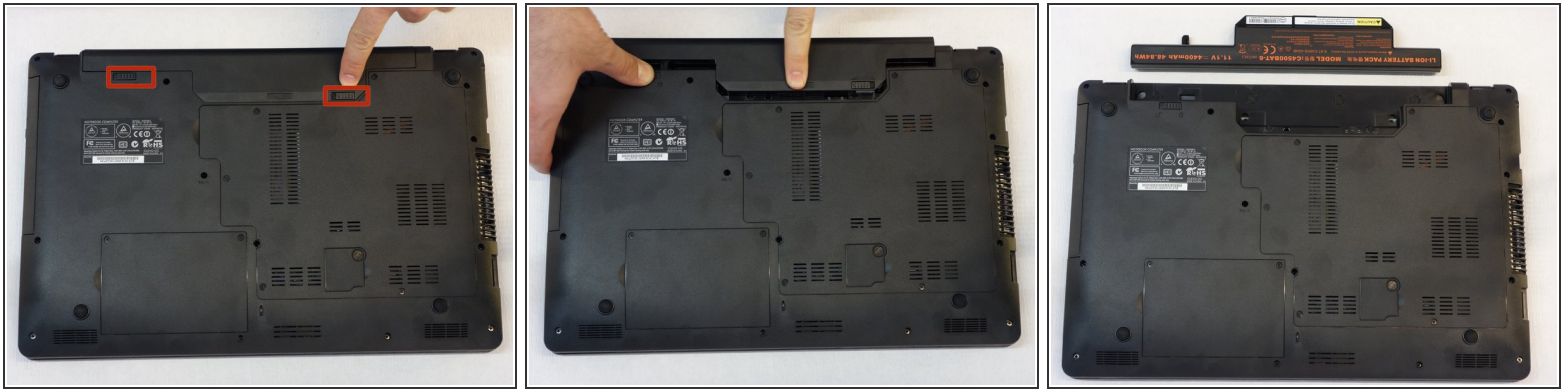

## TOOLS:

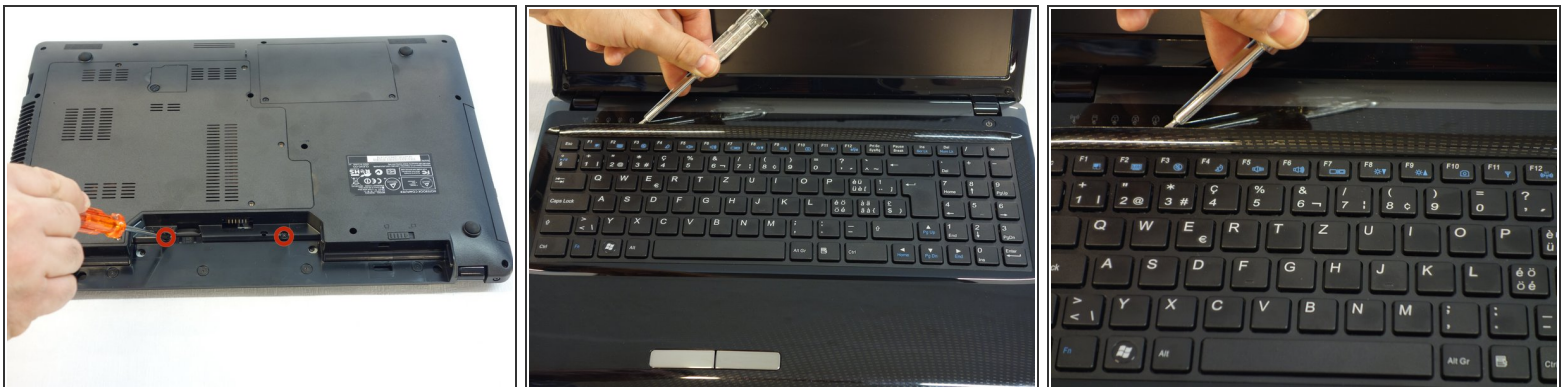

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Battery from why! Remove W253EU

- Turn off the computer.
- ⓘ Before each operation it is important to start with the removal of the accumulator.
- Take the slide unlocked into position, remove the battery.

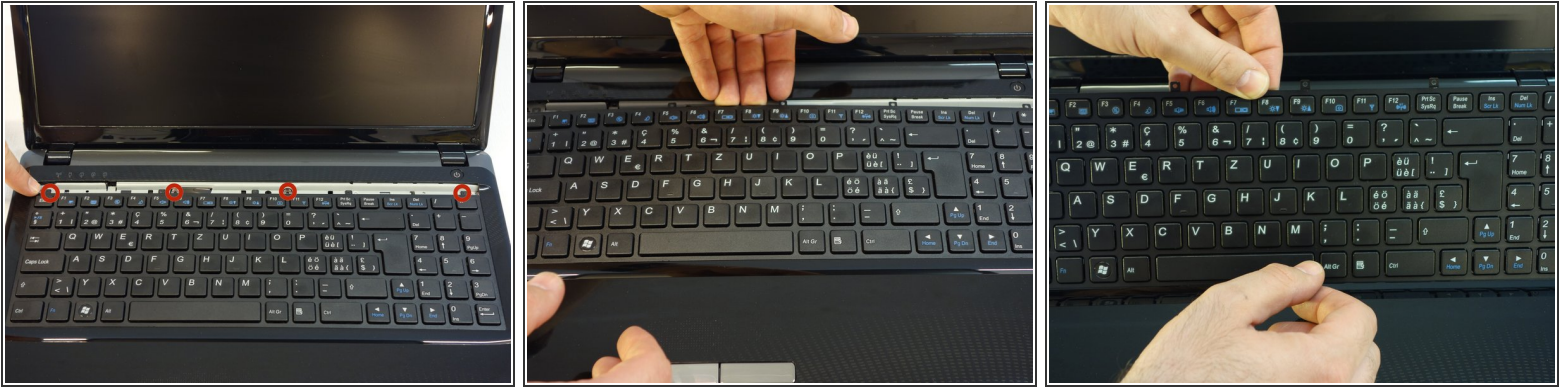

## Step 2 — keyboard

- With the screwdriver Phillips # 1, unscrew the two screws which are located in the slot of the accumulator.
- Insert a standard screwdriver into the slot in the cover above the keyboard.
- Lift the cover with the usual care.

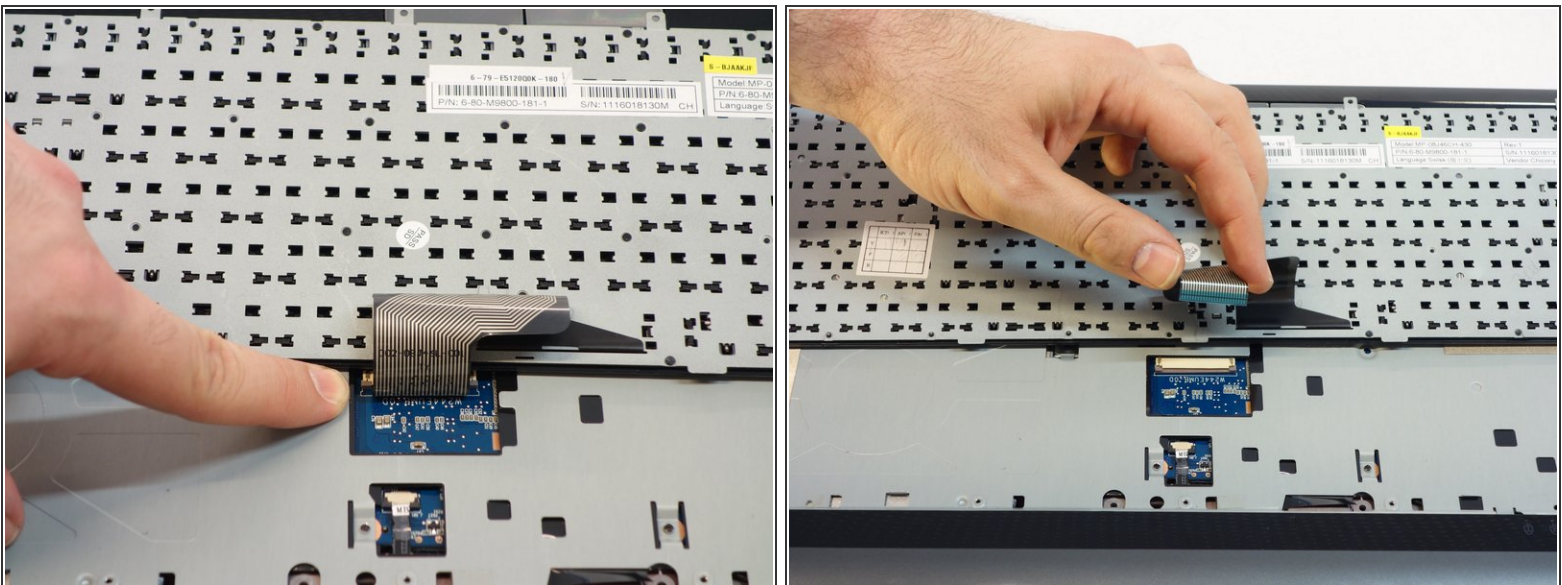

## Step 3

- With the Phillips # 1 screw, remove the four screws securing the keyboard in the upper part.

## Step 4

- Now turn the keyboard towards the screen.
- Carefully remove the connection cable in the direction of the plug axis.

For reassembly, follow the instructions in reverse order.
