## Step 1 — Eject Button Spring

- Insert the back of a plastic opening tool into one of the beater holes.

- Apply force to pull the circular plastic part off.

- If necessary, use the other side of the plastic opening tool to pry the circular plastic part off.
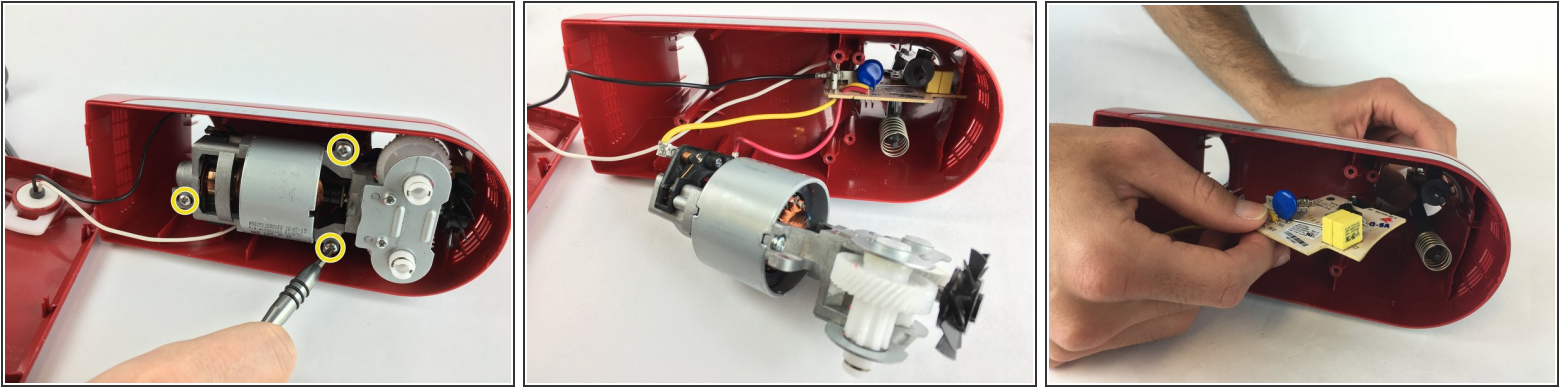

## Step 2

- Use a plastic opening tool to remove the speed knob.

- Use a plastic opening tool to remove the long plastic piece

- Use a plastic opening tool to remove the speed switch.

## Step 3

- Use a Phillips 2 screwdriver to remove the two 20.0mm screws holding the bottom plastic piece on.

- ⓘ Your screwdriver may not be long or narrow enough to reach the screws in these holes. If that's the case, use another screwdriver.

- Remove the bottom plastic piece using a plastic opening tool.

## Step 4

- Using a Phillips 2 screwdriver, remove the three 20.0mm screws holding the motor assembly in place.

- Use your hands to remove the motor assembly.

- Use your hands to hold the eject button from one side while using the other hand to remove the circuit board.

## Step 5

- Remove the eject button by pulling it from the inside of the mixer.

- Hold the eject button firmly while pulling out the spring.
