INTRODUCTION

Removal and replacement of the buttons can be simple and easy. You can also use this guide for simply cleaning your camera buttons if they have a weak connection.

TOOLS:

- [Magnetic Project Mat](#) (1)
 - [Tweezers](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
 - [Soft Cloth](#) (1)
-

Step 1 — Battery

- First, press in and slide forward the battery latch as indicated by the arrow.

Step 2

- Press down on battery until you hear a click and release it. Battery should easily slide out.

Step 3 — Back Panel Frame

- Obtain screwdriver, and remove the 3.85 mm frame screws as highlighted.
- ⓘ Using a magnetized surface to keep from losing screws may be very helpful.

Step 4

- After screws are removed, using both hands, carefully pull the frame apart from the camera as indicated.

Step 5 — Button

- Carefully pick up frame and push upward on buttons.

Step 6

- Clean and replace as needed.
- ⓘ A microfiber cloth, or any other type of electronic cloth may be used to clean them if desire.

To reassemble your device, follow these instructions in reverse order.
