Step 1 — Back Cover

ⓘ Power off your phone before beginning disassembly.

● Insert a thumbnail, or a prying tool like a spudger, into the notch at the bottom left of the back cover.

● Pry the back cover up to separate its plastic clips.

Step 2

- Lift the back cover to release the rest of the plastic clips and remove it.

  - (i) In case you can't lift the back cover completely, slide your fingernail or your prying tool around the midframe to release the remaining clips.

- 📌 To reinstall the back cover, press it firmly into place until you hear a snap from the plastic clips to form a seamless connection with the rear side of the phone.

Step 3 — Battery

- Use a fingernail or a prying tool at the marked notch to lever the battery out of its recess.

Step 4

- Lift the battery out of its recess and remove it.

For optimal performance, **calibrate your newly installed battery** : Charge it to 100%, and keep charging it for at least two more hours. Then, use it until it shuts off due to low battery. Finally, charge it uninterrupted to 100%.

To reassemble your device, follow these instructions in reverse order.

Take your e-waste to an R2 or e-Stewards certified recycler.
