

# LG Optimus F3 Back Camera Replacement

Replace the back camera of an LG Optimus F3.

Written By: Jonathan Fang

---

## INTRODUCTION

This is a replacement guide on how to replace your back camera unit on your LG Optimus F3.

---

### TOOLS:

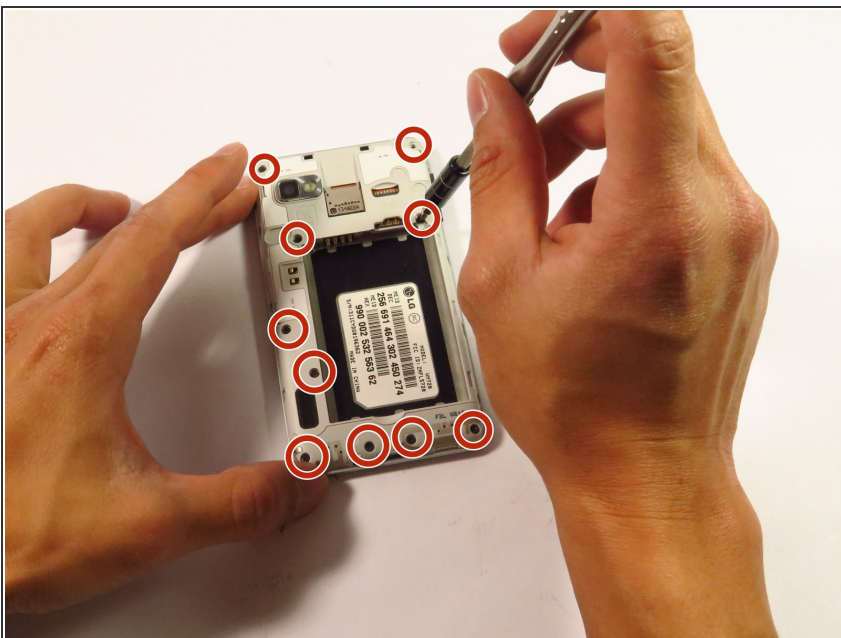

- [iFixit Opening Tools](#) (1)
  - [64 Bit Driver Kit](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Back Camera

- Remove the battery cover. Unsnapping each corner will allow the cover to come off.

## Step 2

- Unscrew the ten 1.0 mm screws on the back.

## Step 3

- Separate the rear plastic case by inserting the opening tool between the seams on all sides.

## Step 4

- Located at the top left corner is the camera unit.

## Step 5

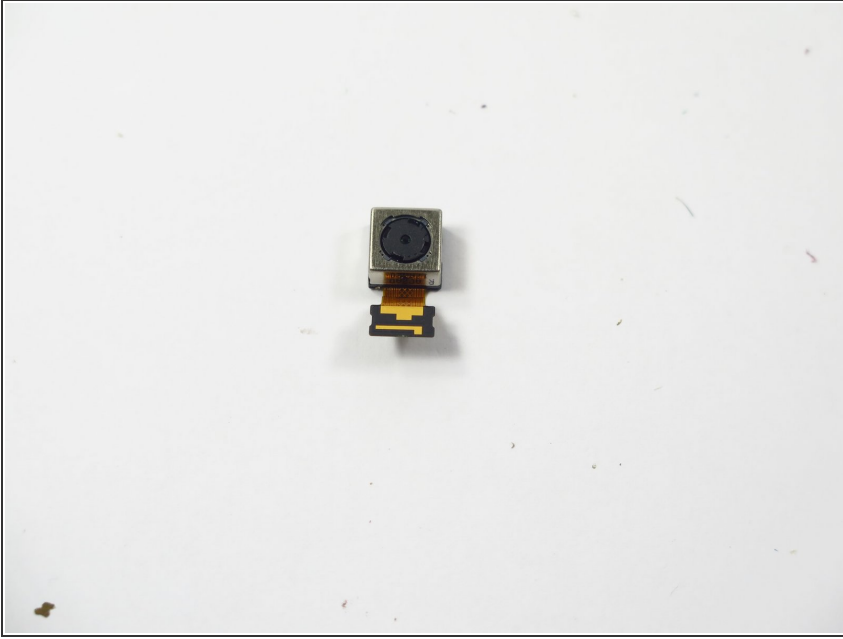

- Use a plastic opening tool to detach the connector between the back camera and the motherboard.

## Step 6

- Use the tweezers to remove the camera by pinching the sides and carefully pulling up.

## Step 7

- There you go !

To reassemble your device, follow these instructions in reverse order.
