

LG Power Battery Replacement

If your battery is not charging, you may need to replace it. Follow this guide to access and replace your LG Power battery.

Written By: Nadia Wilson

INTRODUCTION

This guide is made to help remove the battery from your phone if you are having problems with it or need to replace it. The only real hazard involving this step is removing the back plating of your phone.

TOOLS:

- [Metal Spudger](#) (1)
-

Step 1 — Battery

- Slide a plastic spudger, or guitar pick, between the back and front panel at the bottom .

⚠ A metal spudger can easily damage your device. A plastic opening tool is always the only option.

Step 2

- Carefully pop the back panel off and place it to the side.

Step 3

- Use the thumb tab to remove the battery.

To reassemble your device, follow these instructions in reverse order.
