

# LG Tribute 5 Motherboard Replacement

How to replace the motherboard in your LG Tribute 5, model LS675.

Written By: Renee Dawn Nelson

## INTRODUCTION

This guide will teach you how to replace the motherboard in your LG Tribute 5, model LS675. The motherboard is a circuit board that controls all of the phone's components. If your phone is experiencing issues after replacing the battery, you may consider replacing the motherboard.

## TOOLS:

- [iFixit Opening Tools](#) (1)
- [JIS #00 Screwdriver](#) (1)

## Step 1 — Battery

- Using an iFixit opening tool, gently pull outward on the cutout on the bottom left corner of the phone to remove the back cover.

## Step 2

- Gently lift the battery out from the compartment.
- Use an iFixit opening tool to slide out the SD card and nano sim card from the device as shown.

## Step 3 — Motherboard

- Remove the nine 2mm JIS #00 screws from the mid-frame.

## Step 4

- Using an iFixit opening tool, remove the antenna extender located at the bottom.

## Step 5

- Gently remove the mid-frame using an iFixit opening tool as shown.

 Avoid applying too much force when separating the mid frame. Too much force can bend or damage the device.

## Step 6

- Using an iFixit opening tool, gently disconnect the rear camera from the top center of the motherboard.
- Remove the front facing camera from the top right corner of the motherboard.

## Step 7

- Gently pull the speaker out from its compartment with the iFixit opening tool.

## Step 8

- Disconnect the flex cable from the motherboard with the iFixit opening tool.

## Step 9

- Gently pull up and remove the motherboard using the iFixit opening tool.

To reassemble your device, follow these instructions in reverse order.
