Step 1 — Back Cover

- Press the button on the lower right side of the LG V20 to open the clamp that holds the back cover on the back side of the phone.
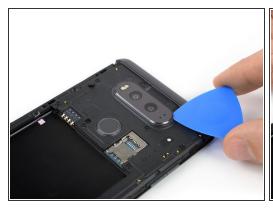

- Remove the back cover.

Step 2 — Battery

⚠️ Before disassembling your phone, discharge the battery below 25%. A charged lithium-ion battery can catch fire and/or explode if accidentally punctured.

- Use the flat end of a spudger and insert it in the small recess at the lower end of the battery.

- Use the spudger to lever out the battery and remove it.

  ⓘ You can do this with your fingers but take care not to puncture the battery with your fingernails.

Step 3 — Rear Lens Cover

● [Use an iOpener](#) to loosen the adhesive beneath the rear lens cover.

Step 4

● Use the tip of an opening pick to gently pry up the rear lens cover.

● Use the tip of the opening pick and slide around the whole rear lens cover to cut the adhesive beneath.

Step 5

- Remove the rear lens cover.

To reassemble your device, follow these instructions in reverse order. Apply new adhesive where it's necessary.
