Step 1 — Battery

⚠ Before removing the battery, ensure that the phone is turned off.

● To remove the battery from your LG VX4500, turn the phone so that the back panel is showing.
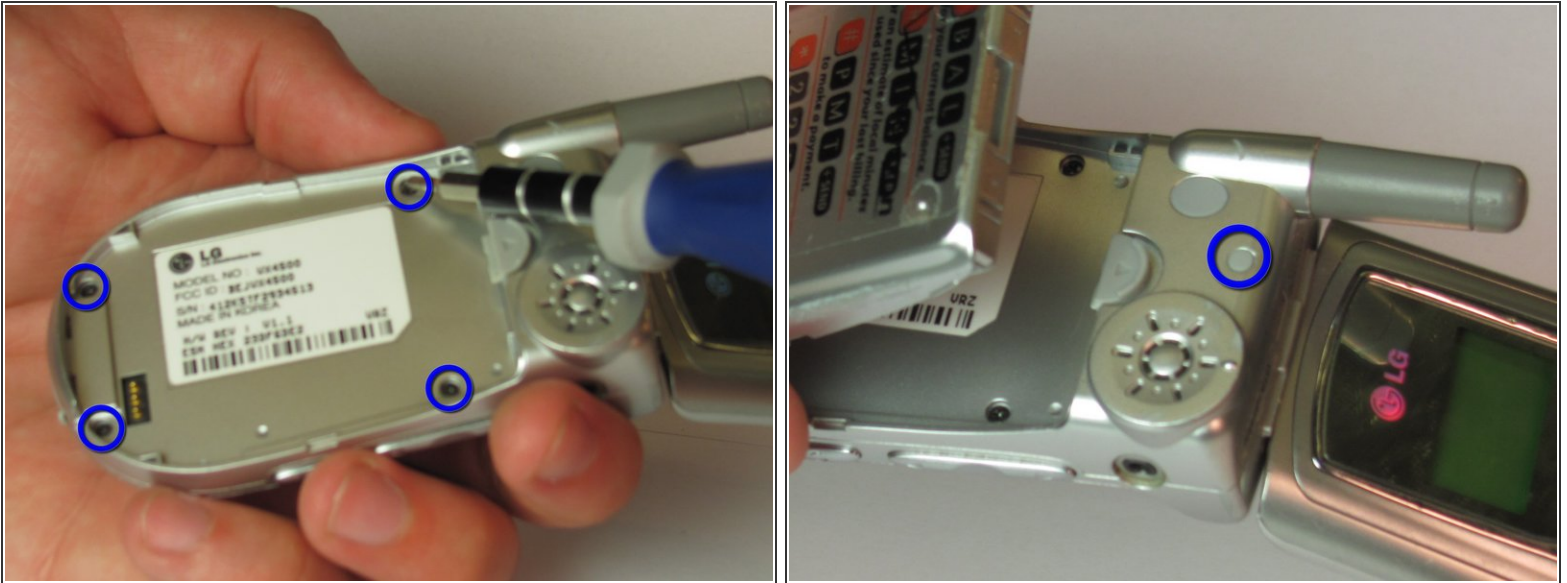

Step 2

● Pull back on the white release tab and lift up the the entire battery.

Step 3

- The back panel should now be fully accessible.

Step 4 — LG VX4500 Disassembly

- Using a paper clip, remove all 4 rubber screwcaps from the screw ports.

- With a Phillips head screwdriver, remove all 4 screws from their ports.

- Also remove the rubber screwcap in the upper part of the back panel along with the screw under it.

- The fifth screw will be more difficult to get out because the plastic port has much higher sides.
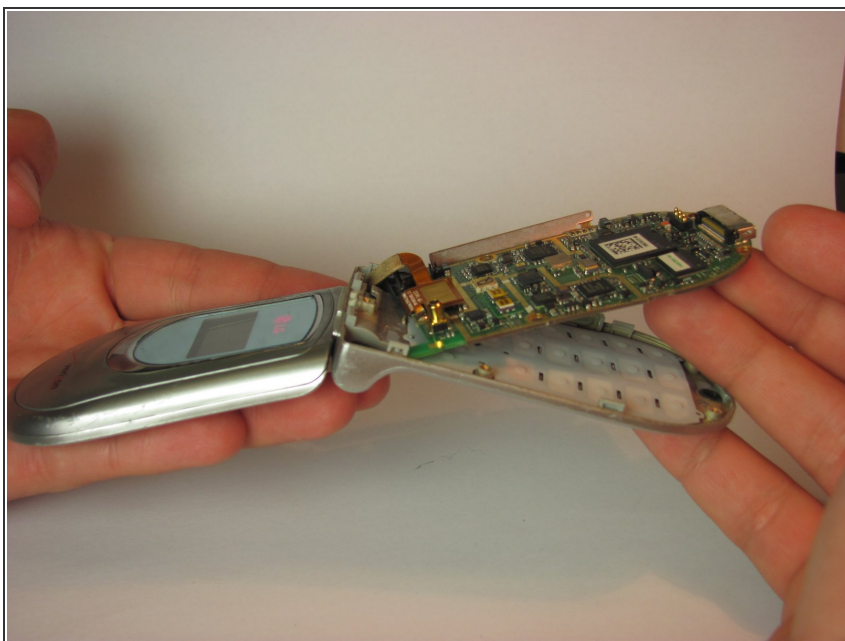

Step 5

- Run a plastic opening tool along the seam to seperate the keyboard cover and the back panel

- Remove the back panel, now the logic board, keyboard and microphone are exposed.

Step 6 — Logic Board

- With your fingers, gently lift up the gold connector until it is completely disconnected.

Step 7 — Keyboard

- Move the logic board out of the way to reveal the keyboard underneath.

Step 8

- Pop the keyboard out using a your finger until the entire keyboard is out.

To reassemble your device, follow these instructions in reverse order.
