

# LG VX5200 Antenna Replacement

Written By: Douglas Blaalid

## INTRODUCTION

A guide to replace the antenna.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)

## Step 1 — Battery

- Turn the phone on its back.

## Step 2

- Orient the phone as shown.
- Remove the battery cover by pushing upward with your thumb.

## Step 3

- Place your fingernail at the top of the battery and pry the battery out towards you.

## Step 4 — LG VX5200 Rear Body Panel Disassembly

- Orient the phone as shown with the battery already removed.

## Step 5

- Remove the 2 plastic plugs located on the side and upper quadrant of the rear body panel by using the push-pin and lifting outwards.
- Use a Phillips #00 screwdriver to remove the 5 screws as shown here.

## Step 6

- Place an iPod opener tool in the seam above the antenna.
- Run the tool around the perimeter of the entire phone.

## Step 7

- Check to see that your device looks like the attached photo.

## Step 8 — Antenna

- Locate the screw and copper fixture that hold the antenna in place.
- Remove the screw from the device using a Philips #00 screwdriver.

## Step 9

- Remove the copper fixture after it has been unscrewed.

## Step 10

- Check to see that your device looks like the attached photo.

To reassemble your device, follow these instructions in reverse order.
