INTRODUCTION

This guide will show you how to replace the "A" and "B" buttons on the controller.

TOOLS:

- Metal Spudger (1)
- Phillips Head Screwdriver: Size PH1 (1)

Step 1 — Battery

- Use the Metal Spudger to push the release clip on the battery cover.

Step 2

- Lift the cover off.

Step 3

- The battery holder is now visible with the removal of the cover.

Step 4 — Buttons

- Use the screwdriver to remove the eight 8.7mm PH1 Phillips head screws.

Step 5

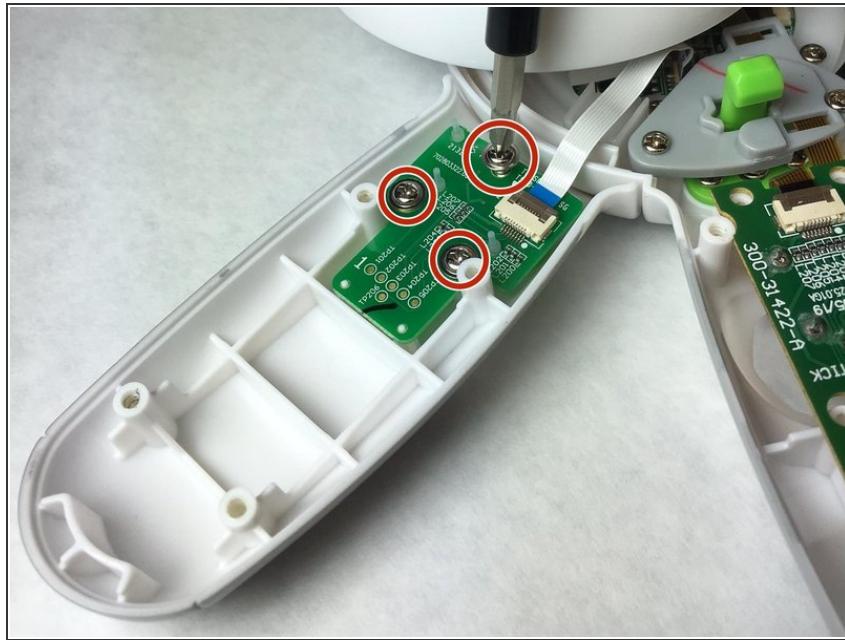

- Slightly lift up on the back cover until the handle covers are free to rotate.

Step 6

- Slide the the side of the handle facing you to the left to reveal the "A" and "B" button circuit board.

Step 7

- Use the screwdriver to remove the three 8.5mm PH1 Phillips head screws.

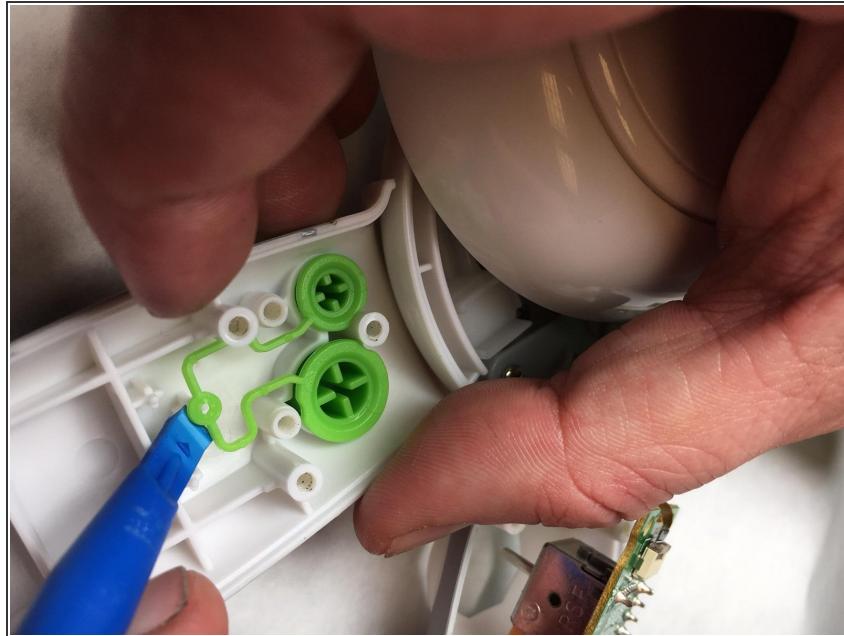

Step 8

- Lift up on the circuit board and move it to the side.

i Be careful to not cause excess stress to the connecting wires when handling the circuit board. Excess stress can cause solder points to break.

Step 9

- Use the plastic opening tool to release the buttons from the controller casing.

Step 10

- Remove the "A" and "B" buttons by pulling up on one of the buttons.

Step 11

- Buttons are now removed.

To reassemble your device, follow these instructions in reverse order.
