

# LeapFrog Scribble and Write Speaker Replacement

Replace the speaker in your LeapFrog Scribble and Write.

Written By: Anthony Kidd

## INTRODUCTION

Your toy's sound may have become muffled or distorted. This issue may be a faulty speaker that will need to be replaced. You will need to be familiar with using a soldering iron before doing this repair.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [Soldering Iron](#) (1)
-

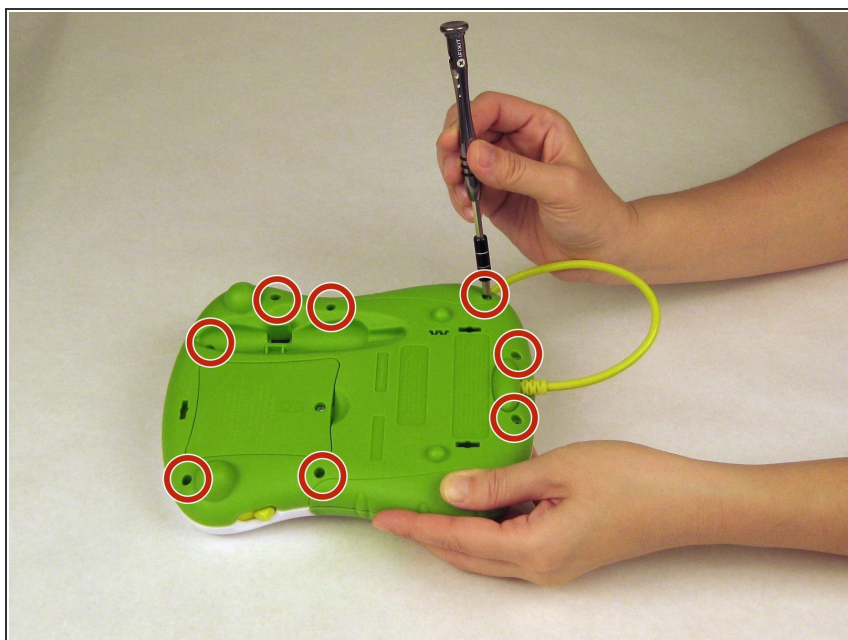

## Step 1 — Speaker

- Turn your toy over so that the back is facing upward.

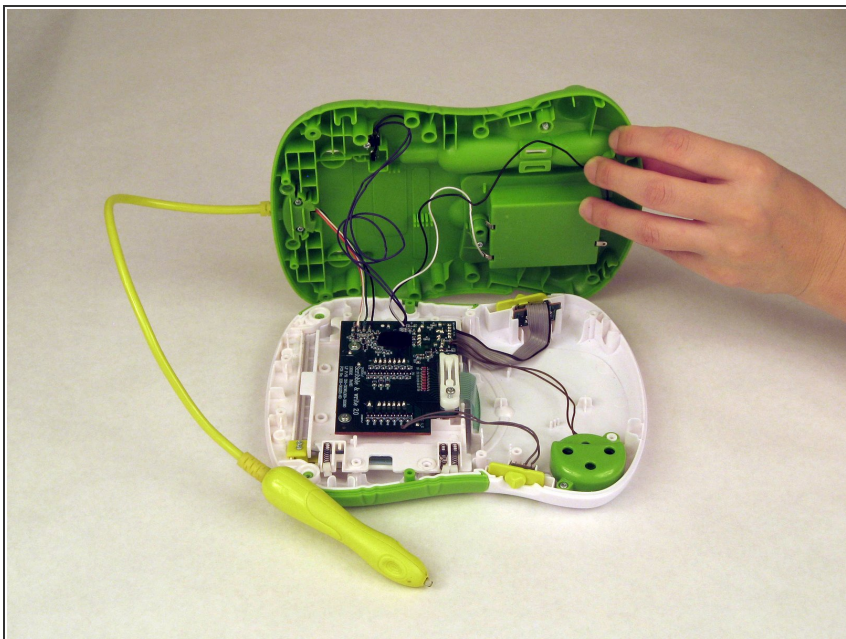

## Step 2

- Using a Phillips head screwdriver, carefully unscrew all 9 screws on the back of your toy. Be careful not to misplace the screws.

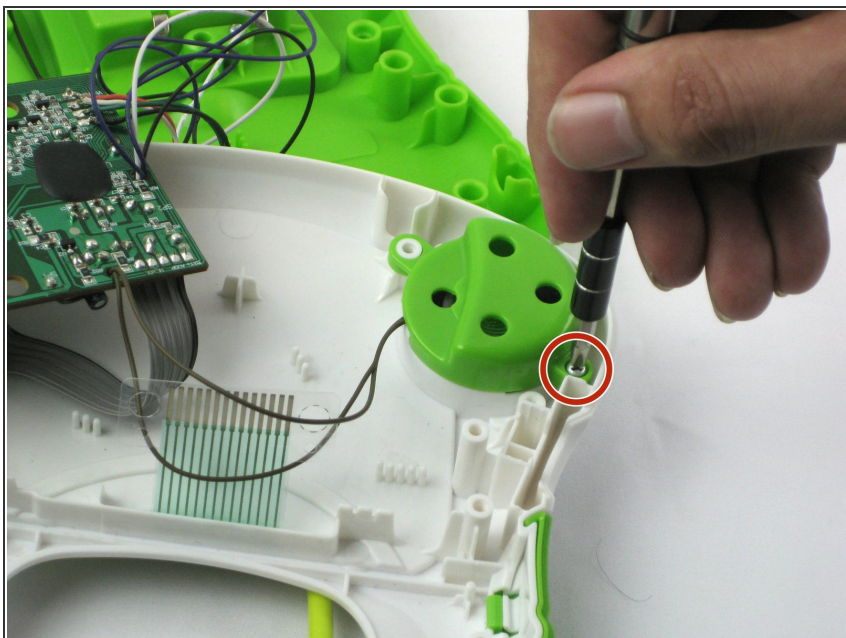

### Step 3

- Very carefully, remove the back of your toy.

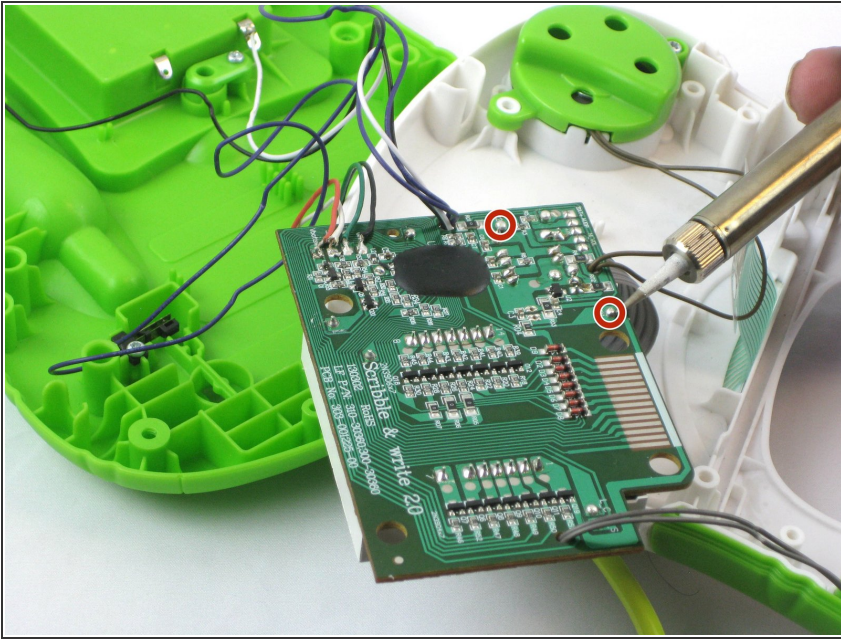

### Step 4

- Using a Phillips head screwdriver, unscrew the speaker. It is circular and green.

## Step 5

- Lastly, use a solder iron to remove the wiring from the speaker and motherboard.

To reassemble your device, follow these instructions in reverse order.
