INTRODUCTION

This guide will show how to remove the speakers for the Lenovo 100s Chromebook-11IBY. This removal will allow you to replace or upgrade the speakers for your laptop.

TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

This document was generated on 2019-11-05 05:21:07 AM (MST).

Step 1 — Speakers

- Ensure your device is turned off and unplugged.

Step 2

- Use a #0 Phillips screwdriver to remove the nine 6mm screws from the larger back plate.

Step 3

- Turn your laptop back over, open it, and use the plastic opening tool on the recessed notch to gently pry each side and lift the keyboard plate up.
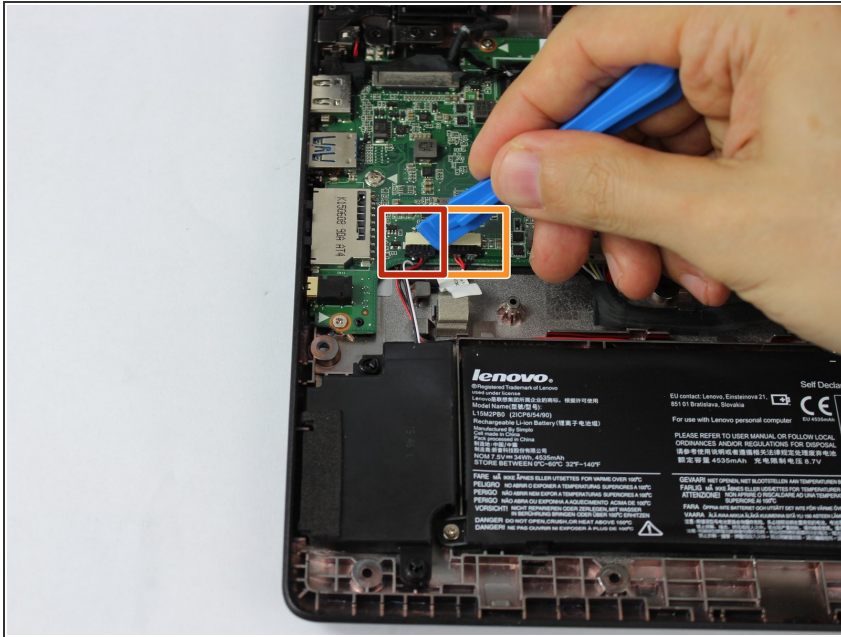

⚠ Be careful not to pull keyboard plate out immediately because cables are attached.
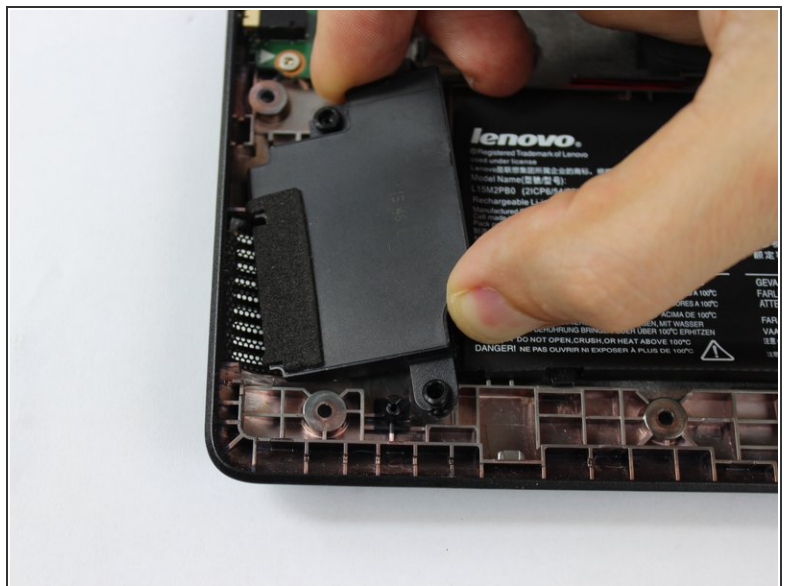

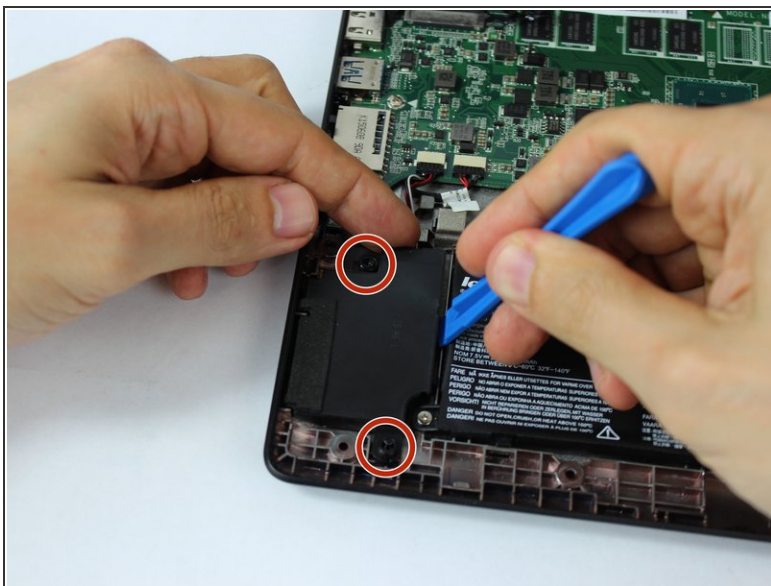

Step 4

- Locate the two sticker-like connecting wires (for the keyboard and touchpad).

- Carefully unplug the orange circled (keyboard) wire from the keyboard plate.

- Carefully unplug the yellow circled (touchpad) wire from the keyboard plate.

- Then lift the keyboard plate up and place it to the side.

Step 5

- Locate the cable attaching the left speaker to the motherboard and unplug it by hand.

- Then unplug the cable attaching the right speaker by hand.

Step 6

- Carefully pry the speaker up and free of the two notches holding it in place.

- Remove the speaker.
