Step 1 — Fan

- Turn laptop over and unscrew the eleven M2 x 6.0mm back cover screws with the Phillips #0 screwdriver.

Step 2

- Gently lift the cover plate off the body of the laptop.

- (i) Ensure that it does not pull on any components such as the USB ports.
Step 3

- Unplug the fan connector.

- (i) Carefully pull out the male header with your fingernails.

- ⚠ Avoid pulling on the wire with a lot of force because this could cause the wire to snap off of the connector frame.
