INTRODUCTION

If your Lenovo Flex 6-11IGM (model #: 81A70005US) has missing or broken keys, use this guide to replace the keys.

The keys on a laptop are essential to do communication through the laptop. Without them you would not be able to have searched for this guide!

🔧 TOOLS:

- iFixit Opening Picks set of 6 (1)

Step 1 — Keys

- Open the laptop.

Step 2

- Take a plastic opening pick and place it under the key.

Step 3

- Using the pick, apply pressure under the key and it should come right out.

⚠ Be careful with removing the spacebar. There are some wires that you must make sure are aligned. Otherwise, you will not be able to use the spacebar.

To reassemble your device, follow these instructions in reverse order.
